## Kashan TCM II Cruise Missile

When Kashan Technological Development introduced their TCM cruise missile and TCM-LS launching vehicle, the PDF military commanders demanded something even more devastating. Instead of opting for a slightly improved missile with perhaps better range or a wider blast radius, KTD technicians went all out and created the most powerful and devastating weapon in the history of the sector.

The TCM II carries an extremely powerful thermo-nuclear warhead which can effectively turn a major city into a crater a hundred kilometers across with massive radioactive fallout that has a half life of nearly a thousand years.

Model: Kashan Technological Development TCM II Cruise Missile

Type: Multi-purpose thermo-nuclear guided missile

Scale: Capital
