Starships D20 / Quasar Fire Bulk Freighter

Quasar Fire Bulk Freighter

The standard Quasar Fire bulk freighter is 340 meters long, with almost all the interior space take up by the cavernous cargo bay. The crew is restricted to the main upper deck which houses the crew and passenger quarters.

The main flight deck is similar to that found on many military cruisers with enough space to install additional work stations for added flight systems. A large open space in the center of the flight deck serves as an ideal point for the installation of a holoprojector. The Virgillians took great advantage of this when converting several of these freighters into starfighter carriers to serve in their civil war. The Alliance would later receive a handful of these converted freighters from the Virgillians.

Like many bulk freighters, the Quasar Fire is unarmed, lightly shielded, slow and unmaneuverable making it useful only in its intended role. The Quasar Fire bulk freighters were first designed during the years leading up to the fall of the Old Republic and many can be found at greatly discounted prices.

Craft: SoroSuub "Quasar Fire" Bulk Freighter
Class: Capital ship
Size: Huge (340 m long)
Hyperdrive: x2 (backup x20)
Passangers: 50
Cargo Capacity: 200,000 tons
Consumables: 6 months
Cost: 3.2 million (new), 1.4 million (used)
Maximum Speed In Space: (squares/action)
Atmospheric Speed: Not applicable
Crew: 34 (Normal +2)
Initiative: +0 (-2 size, +2 crew)
Maneuver: +0 (-2 size, +2 crew)
Defense: 18 (-2 size, +10 armor)
Shield Points: 100 (DR 10)
Hull Points: 360 (DR 10)
