Starships D20 / A-II MEDIUM FREIGHTER

A-II MEDIUM FREIGHTER

This craft fills the gap between the great bulk transports Elrood StarYards are famous for, and the multitudes of stock light freighters. The medium freighter is the choice of the small business for their fleet's main cargo hauler, and is used by the larger companies to fill out their transport fleets. Radel mining uses three of the A-II model, the most sucessful of Elrood StarYard's medium freighters.

While not an outstanding ship in either performance or price, the A-II lives up to the Elrood StarYard's reputation for producing reliable ships.
