Starships D20 / Corellian Engineering Corpor

Corellian Engineering Corporation YX-2000 Medium Freighter

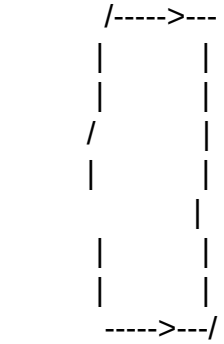

This the the CEC's newest freighter. It was designed after a successful prototype run(the fact that Jade, a smuggler wanted for crimes against the Empire, stole one, and apparently kept it, helped their decision immensely). Of course, it is highly modifiable, but whether or not it is successful remains to be seen.

This freighter is one of the few highly quality ships produced by Corellians in light of their recent local paranoia and xenophobia. It was released shortly after the Battle of Yavin, but sales are reportedly low.

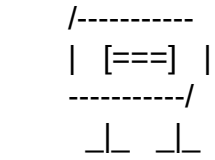

Jade(my brother's PC), stole the prototype for this ship from the Imperial Governor of Dressel(Prune Head's planet), after crash landing his original ship, a battered YT-1300 that was taken by the Imperials and sold to Drierdan Pax, a hunter whose single goal is to kill Jade(it's a long story). His prototype is a heavily modified luxury vessel, quite a contrast to the spartan production model.
