Starships D6 / Republic Squad Dropship

Republic Squad Dropship

The Terra shuttle/dropship served as one of the Republic's main light transport vessels for many years. Its interior was designed to be modular in nature to allow it to ferry many different types of cargo from place to place. Usually the vessel was used to drop a squad of troops and their equipment to the surface. With the troop benches removed it can also carry up to four speeder bikes or swoops or four AT-PT walkers or a light tank (such as the Feleini-Arat T30 siege tank).
