

Starships D6 / Siemar Armed Courier

Siemar Armed Courier

This advanced armed courier design comes from the workshop of the technological genius Raith Siemar, and features laser cannons, extensive sensor systems and an experimental high-temperature ion engine system requiring large radiator panels, which fold inward during landings.

It is sometimes darkly hinted that Raith Siemar is poised to design the deadly spacecraft of a new space navy that would enforce the law of a new order in the galaxy. In fact, Raith Siemar's operations will eventually become Siemar Fleet Systems, famous and feared throughout the galaxy in the days of the Empire. Siemar's Advanced Projects would one day create a distinctive TIE fighter reminiscent of the armed courier which would be used by Darth Vader.
