Trade Federation Container Ship

Familiar to millions of officials and civilian personnel who dealt with them over the skies of numerous planets, the characteristic giant Trade Federation cargo ships had been built over many years, plying cargo among the far-flung stars of the galaxy as part of the extensive market of the Trade Federation.

The container ships making up the bulk of the Trade Federation's commercial fleet would soon undergo heavy conversions and upgrading to make them into venerable battleships to play host of the Trade Federation's secret army.

The stock version of the vessel stretches for more than three kilometers in diameter and can carry approximately a quarter-million metric tons of cargo. They were typically put to use in transporting mass amounts of goods from planet-to-planet, that is, until they began transporting hordes of battle droids and war vehicles.
