

TIE/D Mark 2

The Yuuzhang Vong invasion route bypassed Bastion, but left the Empire feeling incredibly insecure. To complement the new "Resurgence" class Star Destroyers, a new generation of fighters was needed. All were based on the venerable TIE line. Siemar was quite relieved when they got the orders because it indicated to the leadership of Santhe/Siemar Technologies that they had somewhere to run to if things go too hot in the New Republic. All of these new TIEs were factory equipped with "flicker mode" lasers and "grab-proof" shields.

The TIE/d Mk.2 makes only very slight improvements on the original TIE/d. However, one of these improvements is an immense ability to learn. This makes a veteran TIE/d Mk.2 a very challenging adversary and wise captains update all of their TIE/d Mk.2s with the memory of their most skilled droid.
