Starships D20 / TIE/DSD - Datalinked Scout D

TIE/DSD - Datalinked Scout Droid

The Yuuzhang Vong invasion route bypassed Bastion, but left the Empire feeling incredibly insecure. To complement the new "Resurgence" class Star Destroyers, a new generation of fighters was needed. All were based on the venerable TIE line. Sienar was quite relieved when they got the orders because it indicated to the leadership of Santhe/Sienar Technologies that All of these new TIEs were factory equipped with "flicker mode" lasers and "grab-proof" sheilds. They had somewhere to run to if things go too hot in the New Republic.

The TIE/dsd is a specialized update to the TIE/d for scout work. Its sensor data is automatically transmitted to its mothership. The DSD has no weapons, but its enhanced sensor system makes it very useful.

Craft: Sienar Fleet Systems TIE/dsd - Datalinked Scout Droid
Class: Starfighter
Size: Diminutive (6.1 m long)
Hyperdrive: None
Passangers: None
Cargo Capacity: 0
Consumables: 1 day
Cost: 170,000 credits
