

Starships D6 / TriCorp Ashanda-class

Ashanda Heavy Fighter

The Ashanda-class Heavy Fighter was designed by a group of engineers from every facet of TriCorp. The principles, RanCorp, Metacorp, and SATAL Arms all sent their top ship designers in each field (weapons, hull, drive systems, controls ect.) as well as contracting help from the top engineer from each subsidiary company and KDY, Incom, and SFS engineers all pulled together to design and create this ship. They all worked together to make a ship that would be tough, resilient, fast and agile, and deceptively powerful.

The result ended up looking a bit like miniature Mon Calamari cruiser with pods and blisters on the hull at seemingly random spots. But some of the pods hold sensor gear or weapons. Some of the blisters are actually power screws that spiral up into the hull hiding the weapon attached to it in a sensor masked compartment. It's nearly impossible to detect the weapons when they are pulled up. The weapons can then spiral down all at once or individually for use. Once down they can spin back up or even just spin making the weapon turreted. Triple laser cannons and warhead 'hardpoints' are attached in these weapon blisters and thus the concealed punch of this fighter is greater than almost any other fighter in the galaxy.

Also like Mon Calamari ships, the Ashanda-class fighter is equipped with redundant shield systems making it tougher than usual and the entire hull is molecularly bonded at the seams making it tougher and more streamlined. The ship is as agile and swift as it appears to be and can out maneuver an X-wing or TIE fighter with relative ease.

Craft: TriCorp Ashanda-class Heavy Fighter

Type: Multi-role fighter/bomber

Scale: Starfighter

Length: 26 meters

Skill: Starfighter Piloting: Ashanda

Crew: 1; gunners: 1

Crew Skill: Starfighter piloting 6D+1, starship gunnery 7D

Cargo Capacity: 200 kilograms

Consumables: 2 days

Cost: Not Available For Sale

Hyperdrive Multiplier: x2

Nav Computer: Yes

Manuverability: 4D+1

Space: 9

Atmosphere 435; 1,250 kmh

Hull: 4D+2

Shields: 3D*

Backup Shields: 6D

Sensors:

Passive 20/1D

Scan 35/2D

Search 70/3D

Focus 3/3D+2

Sensor Mask:

All weapons blisters when pulled in are set in a protective sensor masking field adding +5D to the difficulty of detecting the weapons when they are in their hidden mode.

Weapons:

4 Triple Laser Cannons

Fire Arc: Turret

Crew: 1 (pilot)

Skill: Starship gunnery

Fire Control: 3D

Space Range: 1-3/12/25

Atmosphere Range: 100-300/1.2/2.5 km

Damage: 4D+2

18 Ordnance Hardpoints

Fire Arc: Varies

Skill: Starship gunnery

Crew: 1 (gunner)

Fire Control: Varies

Space Range: Varies

Atmosphere Range: Varies

Damage: Varies

Note: The Ashanda may be fitted with up to 18 concussion missiles (8D), 18 proton torpedoes (9D), or any combination of the two. Other ordnance includes various free-fall bombs, a pair of "eggs" (5D capital scale), 8 heavy rockets (10D), or 4 heavy space bombs (11D).
