Starships D20 / RanCorp Katarn Space Super

Katarn Starfighter

The Katarn Space Superiorty Fighter was also made to be an atmospheric superiorty fighter. Based off the N-1 design of old Republic days the katarn look quite peculiar. Modern day fighters, mainly snubs, narrow down at the front whereas the Katarn narrows down in the back. A long tail holding the hyperdrive and astromech strectches from the fuselage. On either side powerful twin engines provide incredbile sublight speed. The sleek design gives the craft nearly unmatched manuverability and speed in a stock starfighter. Under the sleek yet broad nose of the craft are twin cannons. On eiether sweeping side of the nose is a proton torpedo tube with a full rack of 6 warheads stored within the craft. Though the armament is actualy less than that of x-wings, it's speed and manuverability make it much more dangerous.
