Starships D20 / HattMark Industries Owarin-I

Owarin-I

The Owarin fighter looks quite similar to the X-Wing when the S-Foils are in cruise mode. However, when put into attack mode, you can see a definate difference. The S-Foils have a wider angle of movement than the ones on the X-Wing, giving it a much slimmer and taller sensor shadow. Had the Alliance been responsible for its naming, it most certainly would have been christened the O-Wing.

Instead of having four bulky engines attached to the wings, the Owarin has four attached to the rear of the chassis.

As with the X-Wing, the Owarin has four laser cannonts mounted on the extremeties of the wings. However, the Owarin does not have torpedo launchers, and also has a lighter hull, allowing it to go much farther and be more efficient.

The Owarin-I model is the interceptor model.
