Starships D20 / Ion Storm Stardrives F-28AE

Ion Storm F-28 Viper

The F-28 Viper is a complicated military fighter that can be fitted for different missions, the third easy to access weapons slot can carry a light or medium weapon such as an ion cannon or torpedo launcher. The Viper can aquire top speeds in seconds, and can outmaneuver most military ships seen today. To pilot the F-28, the pilot must have about 5 years of training, although it seems a lot of pirates have been using neural hookups to link with the ship's computer to fly. This was intended for droid pilots, but with the right moderations can be used on cyborgs.
