- Damage: Special
- Range Modifiers: PB 0, S -2, M/L n/a

Special Notes:
- R-Wing is installed with AUTO Computer (Automatic Utility and Technical Operating Computer), which takes place of the astromech droid.

Physical Description:
- I'm not too good at describing things, but here it goes. The ship's basic design is a semi-spherical shape. Within that semi-sphere, is the cockpit, which takes up about a quarter of the ship's space. The two laser cannons

are place in the front, sticking out of the cockpit window. The Concussion Missiles are located on the bottom, poised to launch in three separate directions. The turret ion can is also at the bottom, and is controlled with AUTO Computer. The rectangular side wings are where the ship's name comes from.
