

Starships D6 / ZAFT CGUE DEEP Arms

ZAFT CGUE DEEP Arms

Craft: ZAFT YFX-200 CGUE DEEP Arms

Type: Experimental mobile suit

Scale: Starfighter

Dimensions:

-Height: 21.55m (head height)

-Mass: 80.83 metric tons (max gross weight)

Skill: Mecha Piloting (OR can use Walker Operations and/or Starfighter/Aircraft Piloting)

Crew: 1

Cargo Capacity: 10 kilograms (or less)

Consumables: 1 week (survival pack)

Cost: 85,000 ZAFT credits

Hyperdrive: N/A

Nav Computer: Yes (short-ranged, carrier-based)

Maneuverability: 3D (all environments)

Speed:

-Space: 7

-Atmosphere: 350; 1,000kmh ("jumps" only)

-Ground (Walking): 35; 100kmh

Hull: 5D+1

-Strength: 3D+1

-Armor: 2D

Shields: N/A

Sensors:

Passive: 25/1D

Scan: 50/1D+1

Search: 70/2D+2

Focus: 4/3D

*Natural Pilots: If a ZAFT mobile suit is ever piloted by a Natural human, all Difficulty Levels for piloting will be increased by one Level. If this roll is not made, the pilot will receive no bonus dice from Maneuverability or Fire Control of Weapons. Also, if a proper Operating System is not installed for natural pilots, then these bonuses will be -1D

WEAPONS (Fixed Armaments):

NOL-Y941 Heavy Laser Sword

Location: Stored on left hip, hand-held in use.

Fire Arc: Close Combat

Crew: 1 (pilot)

Skill: Mecha Combat

Scale: Starfighter

Fire Control: 1D

Space Range: N/A (Close Combat, under "1")

Atmosphere Range: N/A (Close Combat, under 50m)

Damage: Str+ 2D+1

Ammo: N/A

Rate of Fire: N/A

2 JDP8-MSY0270 Directed Thermal Energy Cannons

Location: mounted on left/right shoulders.

Fire Arc: front

Crew: 1 (pilot)

Skill: Mecha Gunnery (OR can use Starfighter/Aircraft Gunnery)

Scale: Starfighter

Fire Control: 2D

Space Range: 1-3/15/30

Atmosphere Range: 50-300/1.5/3km

Damage: 7D+2 (fire-linked, 6D+2 otherwise))

Ammo: N/A

Rate of Fire: 1 fire-linked beam per attack.

DESCRIPTION:

ZAFT CGUE (Pronounced "Seh-GOO")

Although ZAFT is the first organization to create military use mobile suits, it is the Earth Alliance that invents beam weaponry. On January 25, C.E. 71, a ZAFT force under the command of Rau Le Creuset conducts a raid on the Orb Union's Heliopolis colony, where Orb is secretly constructing mobile suits for the Alliance. After stealing four prototype Gundam mobile suits, ZAFT reverse engineers them and begins to incorporate beam weaponry into their own mobile suits. One such design is the experimental YFX-200 CGUE DEEP (Directional Energy Emission exPerimental) Arms, modified from the standard ZGMF-515 CGUE. The DEEP Arms has been equipped with an upgraded battery to power its shoulder-mounted thermal energy cannons. Because the thermal cannons are experimental, they create a high level of heat loss each time they are fired. The DEEP Arms is also armed with a heavy laser sword.

---NOL-Y941 Heavy Laser Sword: The Heavy Laser Sword is a functional cross between close combat and beam weaponry. While it has the damage capacity of a true Beam Saber (Hull Dice count as pips, not dice), it has a solid part that can be broken and therefor ruin the blade. Without the Laser Blade function, it can still act as a standard sword with the solid part, and inflict damage as normal.

*Natural Pilots: If a ZAFT mobile suit is ever piloted by a Natural human, all Difficulty Levels for piloting will be increased by one Level. If this roll is not made, the pilot will receive no bonus dice from Maneuverability or Fire Control of Weapons. Also, if a proper Operating System is not installed for natural pilots, then these bonuses will be -1D

---Ultracompact Energy Battery: in the Gundam SEED setting, ZAFT has dispersed many Neutron Jammers across Earth and uses them extensively in space. This means nuclear power and weapons systems are impossible to use and forces both sides to rely in various compact energy batteries to power their ships and mobile suits.

Because of this, when using any of these machines in the Gundam SEED setting, take the unit's Hull Dice number, multiply it by 100 (add 25 per pip), and this is the amount of power in the battery system (600 for standard GINNs).

When mobile suit/mobile armor launches, it begins depleting its battery by at least 1 per round. If it has energy weapons (i.e., beam sabers, beam rifles, etc.) or other advanced high-energy systems directly connected to its power supply (Phase Shift Armor, Mirage Colloid, etc.), then these will draw more power from the battery. Energy weapons draw power points equal to their Damage Dice. Equipment like Phase Shift Armor or Mirage Colloid draw power points equal to the mobile suit's Hull Dice. All of this is per round of activation.

WRITE-UP NOTES:

The ZAFT CGUE is starfighter scale, like most mecha, because it is space and flight capable. I have chosen most of the dice codes for it based on its size (which is similar to a space transport in Star Wars D6, and lack energy shields), and the fact that it is an early model (other more improved models follow later with improved statistics, which is why the CGUE may still seem comparatively weak in many ways). The Ginn and most standard mobile suits do not actually "fly" in an atmosphere, but can jump with their equipped thrusters. Their space speed may seem slow when compared to other starfighters from Star Wars D6, but these are earlier models (later designs are much faster), and what amounted to "starfighters" (mobile armors) in the Gundam Seed setting were not so fast anyways.

OTHER SPECS:

-Model number: YFX-200

-Code Name: CGUE DEEP Arms

-Manufacturer: ZAFT (Zodiac Alliance of Freedom treaty)

-Operators: ZAFT

-First Deployment: C.E. 71

-Accommodation: pilot only, in standard cockpit in torso

-Armor Materials: unknown

-Powerplant: Ultracompact energy battery, power output rating unknown

-Equipment/Design Features: sensors (range unknown)

-Fixed Armaments: 2 JDP8-MSY0270 directed thermal energy cannon, mounted on shoulders; NOL-Y941 heavy laser sword, stored on left hip, hand-carried in use.

-OPTIONAL Fixed Armaments: none

-OPTIONAL Hand-Held Armaments: none
