Weapons D6 / Model M6G

Model M6G

The M6G Pistol is a semi-automatic, recoil-operated, magazine-fed, dual-wieldable, large caliber handgun. It is a later model of the M6 series pistols that was distributed to members of the UNSC Marine Corps, especially those of vehicular crews, The UNSC Marine Corps aviators are an example of this. The weapon has a polymer handle, along with a titanium alloy body and what appears to be an anti-corrosion nickel-plate finish, It is likely a striker fired weapon, as it has a hammer cocked indicator and no external hammer; Trigger mode is unknown. It fires the M225 SAP-HE (Semi-Armor Piercing, High Explosive) rounds from an 8-round magazine at a velocity of 427 m/sec (1302.35 ft/sec). It has a rather low rate of fire, being only about two rounds a second, or 120 rounds a minute. It has a decent effective range, being able to hit a target accurately up to about 50 meters. Its maximum effective range, however, is around 100 meters. The M6G is quite precise and has a very small shot spread at close to medium ranges. This combined with its decent damage against current shield systems makes it an acceptable weapon of choice when faced with shielded opponents. It has, however, a more effective against flesh and hard/soft armor, being able to kill targets in a single shot to the head or a few shots to the body.

Model: M6G
Type: Tactical Slugthrower pistol
Skill: Firearms: slugthrower pistol
Ammo: 8
Cost: 1600 (clips: 30 standard)

Fire Rate: 1, 2
Availabilty: 3, R or X
Range: 3-10/40/100
Damage: 4D+1 (standard SAP-HE ammo)
Game Notes: When using against a target with body armor,

apply the following damage modifications:
Armor Piercing: +1D

-Also if the user has an compatible electronic HUD for the pistol's scope system,

scope and sight are used for a round of additional aiming but reduce the difficulty of the shot by one level.
