Character Bio - Boba Fett was an unaltered clone?the "son" of Jango Fett?who became an infamous bounty hunter, perhaps the most infamous, in the Galaxy.

Boba lived through the Clone Wars and the Galactic Civil War, surviving both, yet never allying outright with either the Galactic Republic, the Separatists, the Galactic Empire, or the Rebel Alliance.

After the conclusion of the Galactic Civil War, Fett would become the leader of the Mandalorians.

Boba was created by Kaminoans as an unaltered clone, at the request of his "father," Jango Fett, before the start of the Clone Wars. He was intended to be both Jango's heir and "Jaster Mereel's legacy." As a young boy, Fett grew up on the planet Kamino. Jango raised and cared for him with the assistance of the Kaminoan, Taun We, who ultimately took on the role of being a foster mother to him. Along with the Clawdite Zam Wessel, she was the sole female influence in the young Fett's life.

Boba was very fond of books, especially those about starfighters, which he commonly checked out and read from the library of Tipoca City. The chance to see Obi-Wan Kenobi's Delta-7 was a relished opportunity considering his love for the vehicles. Boba was roughly ten years old when Jedi Knight Obi-Wan Kenobi came to Kamino to investigate the mysterious creation of a clone army for the Republic. Fett's father, Jango, realized that he and his son would have to leave Kamino before the Jedi unraveled the mystery behind the attacks on Senator Padme Amidala. After Jango and Obi-Wan fought, Jango and Boba blasted off the planet in their ship, Slave I.

En route to Geonosis, they realized that Kenobi had tracked them. Boba encouraged and intently watched his father outsmart and outmaneuver the Jedi. He eventually watched what they thought was the death of Kenobi. As the Battle of Geonosis started, Boba stood with Jango on the platform in the arena with several Separatist leaders, including Count Dooku, Viceroy Nute Gunray, and Foreman Wat Tambor. When Jedi Master Mace Windu arrived, Jango kept Boba from harm as the Jedi task force attempted to rescue the captive Obi-Wan, Anakin Skywalker, and Padm? Amidala. During the battle, Boba watched his father get trampled by a Reek, and, as a result, eventually decapitated by Mace Windu's lightsaber when Jango attempted to challenge him. While the Grand Army of the Republic and the Separatist Droid Army clashed for the very first time, Boba emerged from his hiding place to pick up his father's helmet.

After Geonosis, Boba buried his father and tried to escape. All he had left of his father was his helmet and a "book" that Jango left to help instruct him, in the event of his death. Boba was later captured by Aurra Sing and given to Tyranus (Dooku), who gave Sing Slave I as payment (Boba eventually recovered the ship). He was taken to Raxus Prime to meet with Tyranus, who was then searching for the Force Harvester. The Sith Lord attempted to detain his young charge, but a Republic attack allowed Fett to escape.

Fett was taken by clone troopers and sent to an orphanage on Bespin. He managed to escape with Aurra Sing, who had come searching for the boy, in order to gain access to Jango Fett's rather large bank account on Aargau.

On Aargou, Fett lost 500,000 credits of his father's money due to the betrayal of a Clawdite named Nuri, but received the rest. Jango's "book" told Fett to visit Jabba the Hutt, but Fett had a run-in with the dangerous Separatist Commander Durge. The Gen'Dai's hatred of all Mandalorians caused him to attack the young Fett.

One of the reasons Jabba accepted Boba was to repay the favor Jango Fett did him by killing Gardulla the Hutt a decade earlier.

Constantly on the run, Fett managed to secure a minor bounty on an assassin before reaching safety. While working for Jabba the Hutt, Boba had befriended one of Jabba's cooks and his daughter (whom he had rescued earlier, after first arriving on Tatooine). In gratitude, the two had

Jango Fett's body armor re-sized to fit the young Boba's frame. This couldn't have come at a better time, since Jabba was about to give him his first off-world assignment. His first major hunt off-planet was after Techno Union Foreman Wat Tambor, who had a base on Xagobah. The planet was under assault by the Grand Army of the Republic, so Fett encountered difficulties sneaking past both attack forces. He managed to get inside the base and brutally finished off Nuri, but the arrival of General Grievous foiled his plans, as Fett proved no match for the Kaleesh warrior. Both Wat Tambor and General Grievous escaped.

Boba Fett tried to give pursuit in Slave I, but the ship was damaged in a dogfight with Asajj Ventress. Slave I was actually saved from destruction because of the intervention of a young Jedi Knight named Anakin Skywalker, who drove off Ventress. After forcing Slave I to land on a nearby moon, Skywalker and Fett met for the first time. Skywalker, knowing that Fett was obviously not a Separatist, assisted Boba in repairing his ship. During this time, Boba repainted his armor, which was identical to Jango Fett's, into the green color scheme that he is most identified with, thus making it his own. Even though Skywalker had helped him repair his ship, he was intent on taking Fett in for violating air space in a Republic controlled military zone. Boba convinced Skywalker, however, that he had information vital to the Republic's survival. Information he would only tell the Supreme Chancellor. The information Boba had was knowledge that Count Dooku and Darth Tyranus were one and the same person. He would trade this information in order to get close to the one person he hated the most?the Jedi who had killed his father on Geonosis, Mace Windu.

After being escorted to Coruscant by Governor Tarkin, Boba finally acquired his one and only chance at Mace Windu. Boba followed and waited for the Jedi in the Supreme Chancellor's chambers, of all places. Boba engaged Mace Windu in combat but could not kill the Jedi Master. The two stood, battered and wounded, each ready to deliver a final blow with their weapons. The fight was actually halted by Supreme Chancellor Palpatine, before either one could make a move. Boba was surprised to learn that the Chancellor already knew that Dooku was Tyranus. He also knew that Boba would hunt down Mace Windu, once he arrived on Coruscant. "I believe we share a common enemy," the Chancellor told Fett. Palpatine paid Fett for his information and told him never to speak of their conversation again. An agreement that Boba wisely kept. Then the Chancellor sent him on his way.

By the end of the Clone Wars, Boba Fett had reached the age of thirteen?the traditional start of adulthood in Mandalorian culture. Fett was now a fully-fledged bounty hunter.

For years to come, Fett's reputation grew among bounty hunters and assassins. Boba continued to acquire and upgrade pieces of Mandalorian Armor. It is said he had at least three complete sets of armor from which to use, one of which was mostly left in the Sarlacc pit. Eventually he found the Mandalorian armor of Jango's old mentor and leader, Jaster Mereel. Along with his new attire, he had honed his skills as an assassin and mercenary, which would one day make him the most feared and sinister bounty hunter in the Galaxy.

For a time Fett worked for Malorum, a vicious Imperial Grand Inquisitor, operating on far flung worlds such as Polis Massa, Naboo, and Bellassa. At the Red Twins, Fett battled the fugitive Jedi Obi-Wan Kenobi and Ferus Olin, forcing them out of the system before crash-landing Slave I in a nearby nebula.

In 15 BBY, Sise Fromm hired Boba Fett to eliminate the racing team of Jord Dusat and Thall Joben as they prepared their modified landspeeder, the White Witch, for the Boonta Speeder Race. Failing to sabotage their racer before the race began, Fett entered the race in his own craft, the Silver Speeder, and harassed Thall throughout the event until one of his own weapons backfired on

him, knocking him out of the race and allowing Thall to win. An unhappy Boba Fett decided to turn Sise Fromm over to Jabba the Hutt for the bounty that the Hutt crime lord had placed on his rival.

Three years later, in 12 BBY, Fett returned to Kamino, where he led a special detachment of the 501st Legion on a mission to eliminate a group of clones bred to fight against the Empire. Fett was selected to lead this mission due to his intimate experience with the Kaminoans and his knowledge of Tipoca City.

Rumors would later emerge that Fett had enrolled at?or infiltrated?the Imperial Academy on Carida, serving as a stormtrooper, but deserting after he killed his commanding officer. Whether this was ever true is unknown, however, as it is natural for such rumors to have spread because he shared the same face with millions of stormtroopers. It may have been a simple distortion of his exploits on Kamino.

In the decades between the Clone Wars and the Galactic Civil War, other unsubstantiated rumors of Fett's exploits prevailed. One such rumor had Fett as a Journeyman Protector on Concord Dawn, using the name of Jango Fett's old mentor, Jaster Mereel. The title was then stripped from him, after he killed another fellow Protector, and he was forced to leave the planet, in exile. The fact that Fett wore the honor sash of a Journeyman Protector tended to lend credit to this story. Boba himself, however, never did anything to dissuade these rumors. In fact, he sometimes encouraged them, as they hid his true origins, and added to his mystique.

At some point during this time, Boba met Sintas Vel, a Kiffar bounty hunter. Fett and Sintas later conceived a child, Ailyn Vel. Fett's job allowed for few attachments, however, and the relationship failed to last long.

Early in his career, Fett met Fenn Shysa and Tobbi Dala, who also wore Mandalorian armor. Jodo Kast, a fraudulent irritant, also wore the garb, though it was mostly just to cash in on Fett's growing reputation.

Later, Darth Vader hired Fett to capture an Imperial named Abal Karda. On Maryx Minor, Vader arrived to end the deal and take the prisoner himself. Fett, still under contract, wanted the bounty, and the pair fought. The two battled until Vader turned his attention away from Fett momentarily, at which point Fett debated executing him, but decided against it, due to the fact that if he did, the Empire would trouble him to no end. Thus, the fight ended in a draw, and the two set aside their differences.

Not long after, Fett met Han Solo for the first time, in a brawl on the world of Jubilar. It was the beginning of a long rivalry. Many times Fett was sent to capture Solo, but due to continual bad luck and interference (once from Solo's friend Lando Calrissian), Fett failed to apprehend his quarry time and time again.

On one occassion, Fett was hired by Grand Moff Wilhuff Tarkin to apprehend Han Solo on charges of treason. However, Darth Vader disapproved of the Empire hiring bounty hunters to track down enemies, for at the time there were many opponents to the Empire and he believed it would show a sign of weakness on the Empire's part. Tarkin agreed with Vader's assessment, but refused to call off Fett. Instead, he recommended Vader beat Fett to the bounty; the defeat of Boba Fett, the greatest bounty hunter in the Galaxy, would send a powerful message out to all the systems.

While Fett tracked Han Solo from Hoth to Tatooine, Vader was not far behind. Fett eventually located Solo in a cantina and placed a trap near the back entrance. As Fett waited for his prey to

enter the trap, Vader appeared and attempted to take Solo by force. Fett, not wanting the bounty taken from him, engaged Vader in battle as Solo tried to escape out the back. Solo ran into Fett's trap, a stasis-field, which immobilized him. Vader took the upper-hand in battle until Fett made an unexpected move, unleashing a lightsaber of his own. The two clashed briefly, and though Vader's skills with the lightsaber greatly out-matched Fett's, Boba's brute force, ferocity, and pure determination allowed him to hold his own. In the fray, the stasis-field was damaged and Solo escaped. Vader, more interested in catching Solo, removed himself from the fight, though Fett would lose Solo's bounty. Angered, Fett declared that he would find Solo, wherever he hid. Fett's hatred for Solo never died.

Boba Fett was often employed by the Imperials as a bounty hunter, and chose not to belong to the Bounty Hunters Guild. If anything, he felt contempt for their rules and the needs that had brought them together. Boba Fett accepted a commission to infiltrate the Guild and destroy it. He had beaten two Guild members, Bossk?an old rival?and Zuzkuss, to a bounty. When Boba delivered his quarry to his contact, Kud'ar Mub'at?a strange spider-like alien called an Assembler?he was offered the job. He accepted, though he did not know then who was behind the contract. He went to the Guild station under the pretence of joining. The head of the Guild, Bossk's father, Cradossk, welcomed him, but the younger hunters were greatly displeased with his decision to join.

Once part of the Guild, Boba assembled a team of hunters, including his old friend, the cyborg D'harhan, to go after Oph Nar Dinnid. The Lyunesi had a huge bounty on his head. The trail led to a clan of Shell Hutts for whom Dinnid hoped to work?but by the time Boba got there, one of the Hutts had killed Dinnid in a fit of rage. In the bloodshed that inevitably followed, D'harhan was killed. Zuckuss reported that Bossk had also been killed. Cradossk was pleased. He had been about to initiate a purge anyway. However, Bossk appeared and tore his hapless father apart. The result was exactly what Fett had been employed to engineer. The Guild was split in two along age lines.

Despite their long-standing rivalry, Fett and Bossk teamed up to trap Trhinn Voss'on't?a renegade Imperial stormtrooper who had killed his crew and absconded with secret encryption codes?by making it look as if Bossk had managed to kill both Zuckuss and Fett, and now wanted to team up with Voss'on't. This scheme worked up to a point, but Voss?on?t eventually caught on. Boba and Bossk managed to capture him, but he triggered an earthquake device and injured both hunters badly.

A resentful Bossk tried to take revenge on Fett for his part in the Guild's destruction, but Boba, aided by Zuckuss, got the drop on him. The alliance with Zuckuss was a brief one, for Boba, still under the employ of Mub'at, turned the tables on both of them. They barely made it out of Slave I alive.

Boba took Voss'on't to Mub'at's web, chased the whole way by the renegade Imperial's men. Boba ignored them, but when he dropped out of hyperspace, Slave I was immediately attacked. Faced with two alternatives?flee or fight his attacker?Boba found a third. He put Slave I between his assailant and Mub'at's web, then ploughed the ship straight into Mub'at.

The arachnid alien was terribly wounded, but refused to pay Boba, informing him that he had not set the bounty. Boba then realized that it had been set by his attacker, whom he had identified as Prince Xizor, the infamous underlord of Black Sun. Mub'at told Boba that Xizor was also the one behind the plan to break up the Guild. When the crime lord arrived, Boba captured him, only to find that Xizor had negotiated a deal with Balancesheet, a now renegade subsystem of Mub'at's that had declared its own autonomy.

Xizor did at least pay the bounty on Voss'on't. All Boba could do was limp away in his damaged ship. That was when he realized that Balancesheet had played a last trick?he had taken half the bounty to cover "expenses." For that, Boba vowed, there would be a reckoning.

During the Battle of Thyferra, in which pirate codes were found on Rebel weaponry, Fett was recruited by Darth Vader to eliminate pirate defenses over Ilum to allow Imperial reinforcements to move in to flush out the leader.

Fett eventually returned to Tatooine, and again worked in the palace of the crime lord Jabba the Hutt. During this time, Fett was hired by Rom Mohc to kill Kyle Katarn because of Katarn's intrusions into the secretive Dark Trooper Project but, despite Fett's prowess, Katarn escaped the encounter on Coroscant and went on to destroy the project. As a member of Jabba's gang, Fett accompanied the Hutt to confront Han Solo, a smuggler and a long time rival of Fett, about a spice shipment he had failed to deliver.

Around 0 BBY, the Empire employed Fett to find where the Rebels were hiding after they had escaped Yavin IV. Both the Empire and the Alliance had been searching for a mystical talisman and Solo had captured it on the Falcon. On his way back to the rebel base, Solo contracted a sleeping virus from the talisman. This caused him to lose control of his prized ship, Millennium Falcon, and crashland on the water moon of Panna.

Luke Skywalker arrived on Panna just as Boba Fett arrived riding a creature. It
