Description:The GTF Ulysses is a vessel jointly constructed by the Terrans and Vasudans, brought into active service during the Great War. It was one of the fastest and most agile ships in its class, and even during the Second Shivan Incursion, over three decades later, the Ulysses still demonstrated an agility and top speed comparable to interceptors such as the GTF Perseus and GVF Serapis. The speed and agility of the Ulysses is offset by its small missile bank and low shield and armor ratings.
