Weapons:*

*: The Centaur carries no weapon launchers, but it's cargo usually is comprised of various warheads and missiles to resupply fighters and bombers during a battle, this makes it a volatile and tempting target for enemy attack.

Description: The Centaur support ship is designed to get in and out of battle as quick as possible. It is fast, and quite maneuverable, allowing it to dock with fighters in a minimum amount of time. Most notable about the Centaur, however, is its extremely large explosion radius. The amount of warheads carried on a support ship makes it very dangerous to be close to an exploding Centaur.
