Description: In 2360, Allied Command commissioned the first of the GVD Hatshepsut-class destroyers. The Vasudan contractor Akheton designed the Hatshepsut to efficiently integrate the new beam cannon. The process of retrofitting the older Typhon-class warships yielded vessels prone to system failures and reactor overloads. Though a handful of modified Typhons remain in service, the Hatshepsut has taken over as the primary Vasudan destroyer. With 24 turrets, 5 beam cannons, and 2 fighterbays, destroyers such as GVD Psamtik of Deneb's 13th Battle Group serve at the vanguard of the modern Vasudan fleet.
