Special: The Ptah is a stealth fighter, which increases difficulty to detect it on sensors by 2 difficulty levels.

Description: The stealth prototype GVF Ptah was a top-secret development project assigned to Vasudan conglomerate Akheton Corp. Designed to be invisible to standard detection arrays mounted on combat craft, Ptahs have performed admirably during their OpEval period. The masking materials and blending technologies used across their outer surfaces seem to confuse

Shivan detection systems as well. The Ptah is currently available only to select fighter units in the Vasudan navy, with no word on when they will be more widely distributed.
