Starships D6 / GTW UD-8 Kayser

GTW UD-8 Kayser

The GTW UD-8 Kayser is the result of an intensive study of Shivan weapon technology. The Kayser emits focused waves of subatomic particles that bombard its target. Impact causes the wave function of the particles to collapse and emit extremely intense, zero-point energy microbursts. Standard policy dictates that weapons of this magnitude be mounted only on bombers, but it has become common practice for field technicians to mount them on fighters.

Model: GTW UD-8 Kayser
Type: Laser Cannon
Scale: Starfighter
Skill: Starship Gunnery
Cost: 11,850
Fire Rate: 1
Fire Control: 1D
Space Range: 1-3/6/9.75
Atmosphere Range: 50-300/600/975
Damage: 8D
