Characters D6 / Cassian Jeron Andor (Human

Name: Cassian Jeron Andor {as of Andor Season 2 / Rogue One}
Homeworld: Kenari, Ferrix (adoptive)
Born: 33 BBY, Kenari
Died: 1 BBY, Scarif
Species: Human (Kenari)
Gender: Male
Height: 1.78 meters (5ft, 10in)
Hair color: Brown-black
Eye color: Brown
Skin color: Tan
Family: Kassa's family, Andor family (adoptive family)
Parent(s): Maarva Carassi Andor (adoptive mother), Clem Andor (adoptive father)
Partner(s): Bix Caleen
Sibling(s): Kerri
Children: Bix Caleen's child
Affiliation(s): Alpha, Galactic Empire, Axis network, Aldhani rebel infiltration team (as a mercenary), Narkina 5 Imperial Prison Complex, Unit Five-Two-D, Table Five, Ferrix resistance movement, Alliance to Restore the Republic, Massassi Group, Rebel Alliance Intelligence Service, Alliance Army, Andor team, Rogue One
Move 10

EQUIPMENT
CREDITS - 150
A280-CFE blaster 5D (can be reconfigured into an assault rifle or sniper rifle)
MW-20 Bryar pistol 4D
Brown Corellian-cut field jacket (+1D vs Physical Damage, +1 vs Energy Damage, Arms and Body only). Containing a personal identifier transponder which conceals a suicide pill.
Compact security kit concealed inside one boot (+1D to security)

FORCE SENSITIVE - N
FORCE POINTS: 5
DARK SIDE POINTS: 2
CHARACTER POINTS: 17

Description: Cassian Jeron Andor was a human male operative of the Alliance to Restore the Republic who was remembered as a hero after his sacrifice to secure the Galactic Empire's Death Star plans at the Battle of Scarif. An accomplished spy and assassin, Andor was well-respected within the Rebellion and was trusted with leading Alliance Intelligence missions by Alliance High Command.

Originally a Kenari boy named Kassa, the human was rescued by smugglers Clem and Maarva Carassi Andor after a Republic vessel had crashed on his Mid Rim homeworld of Kenari prior to the Clone Wars. Thereafter, the boy was named Cassian Andor, given a forged identity as an individual born on the planet Fest, and settled with his adopted family, including the droid B2EMO, on the Free Trade sector world Ferrix. After the execution of his adopted father, Andor came into conflict with Imperial authorities. Before officially joining the Rebellion, he was contacted by the leader of the Axis network, Luthen Rael, and participated in the Aldhani heist. For a brief period of time, using his share of the money stolen from Aldhani, he lived as a tourist on the planet Niamos using the alias Keef Girgo, before being arrested and becoming a prisoner in the Narkina 5 Imperial

Prison Complex. Upon breaking out, Andor received news that Maarva had passed away, and returned to Ferrix, where, following a riot induced by his mother's final recorded message, Andor eventually joined Rael's network and made his way into the war against the Empire. During his time in the Rebellion, Andor worked as a skilled spy, assassin, soldier, and pilot, operating many rebel missions with aliases such as Willix, Aach, Joreth Sward, Varian Skye, Ronni Googe, Clem, and the codename Fulcrum.

By 1 BBY, Andor was a captain for Alliance Intelligence and was assigned to assist in Operation Fracture: to extract Imperial scientist Galen Walton Erso, responsible for the development of a secret Imperial "planet-killer" superweapon. Erso had tasked cargo pilot Bodhi Rook with delivering a message about the weapon to renegade rebel leader Saw Gerrera on the moon Jedha. Andor, alongside his droid companion, K-2SO, and Galen's daughter Jyn Erso, traveled to Jedha City and made acquaintances with two local Guardians of the Whills: Chirrut Îmwe and Baze Malbus. Together, they recovered Rook from Gerrera's enclave of rebel Partisans, and Jyn Erso watched her father's holographic message about the superweapon—named the Death Star. After narrowly escaping the test firing of the Death Star on Jedha, the crew traveled to the planet Eadu, where Galen Erso was stationed at an Imperial laboratory. Andor was secretly instructed by Alliance Intelligence's General Davits Draven to assassinate Galen Erso, and to that end, the rebel operative kept his intentions to himself and lied to Jyn Erso that they would retrieve her father.

However, Andor was conflicted as Jyn Erso claimed that her father, per the message she received, was deceiving his Imperial superiors and had installed a fatal flaw within the Death Star—one that the rebels could exploit to utterly obliterate the weapon. Andor hesitated while Galen Erso was within his sniper rifle's scopes, and rebel reinforcements bombed the Imperial facility, killing Jyn's father. After Andor pulled Jyn Erso away from the ruined facility and their crew hastily fled aboard a stolen Imperial transport, the rebels gathered to discuss the threat of the Death Star at their hidden fortress on the moon Yavin 4. When Alliance High Command rejected Jyn Erso's plea to steal the Death Star plans from an Imperial installation on Scarif, Andor assembled a team of soldiers willing to act of their own accord, having been inspired by Erso's assertion that rebellions were built on hope and determination against all odds.

The rebel team, designated Rogue One, was comprised of Andor, Erso, K-2SO, Rook, Îmwe, Malbus, and Sergeant Ruescott Melshi, and aimed to steal the plans themselves. Andor, Erso, and K-2SO snuck into the Scarif base's Citadel Tower vault, while Melshi led the bulk of their forces to cause chaos around the base by planting detonators and engaging the Imperial garrison. Upon the arrival of the Alliance Fleet in Scarif's orbit, Andor and Rogue One requested the fleet to disrupt the planetary shield so that they could beam the Death Star plans to the fleet. Although the rebels succeeded in transmitting the plans, the Death Star itself came to Scarif and fired upon the Imperial base: Cassian Andor and Jyn Erso embraced each other on the shores of Scarif in their last moments, satisfied that Jyn's father would be proud. Thanks to Rogue One's efforts, the Rebellion used the plans to identify the weak point planted by Galen Erso, and the Death Star was soon destroyed.

Personality and traits

Overview

A good rebel agent who held dark secrets, Andor was a human male standing at 1.78 meters tall, with brown-black hair and brown eyes. He held a reputation for having striking good looks, which he used to lure in the unsuspecting during his service as a Rebel spy.

Younger days

As a young man, Andor kept his origins close to his chest, officially denoting that he hailed from the

planet Fest instead of revealing the true nature of his childhood on Kenari. However, he did trust some close friends and romantic partners with the truth, including Bix Caleen. He did not tell many, but he also did not keep track of everyone that he told. Although he had needed to leave her behind years prior, Andor also never forgot his sister Kerri and actively searched for her. He was prone to owing various individuals money, at one point being in debt to Nurchi and Brasso, the latter of whom he was more keen to pay back due to being good friends with the man.

He also had a reputation of being something of a womanizer. When trying to explain away a mysterious injury to Caleen, the latter wondered if it may have been caused by a jealous husband. When Andor's mother Maarva was trying to figure out who knew that Andor was born on Kenari, she stated that she was worried about "all his women," naming some of them before admitting that there were some names that even she did not know. Arvel Skeen was quick to inform Andor that their fellow Aldhani rebel infiltration team member Cinta Kaz was already "sharing a blanket." Andor eventually developed into a selfless man, which set him apart from other, more extreme rebels who blurred the same lines as him.

Rebel agent

As a Rebel, Andor was a committed, steady, practical, and by-the-book intelligence officer with a fair amount of combat experience, but that experience grew from missions that sometimes blurred the line between what was morally wrong or right. Despite his selflessness, he was cold and distant to others. Andor often kept quiet and reserved, a trait he had acquired due to his experience in war. Although fighting on the side of the Rebel Alliance, he'd been hardened by war to the point that he did not hesitate to commit morally questionable acts when necessary. During those days of the early rebel movement, he relied on the excuse that he was following orders to justify what he had done.

Although he displayed some degree of remorse and regret after some of his actions, such as he chose to execute Tivik during the mission to the Ring of Kafrene, it was never enough to convince him to seek redemption until his adventure with Jyn Erso. Nevertheless, he was more morally conflicted than fellow insurgent Saw Gerrera, who also went to great lengths to uncover intelligence on topics, particularly weapons, that threatened the Rebels. In a briefing to Mothma, General Draven described Andor as "one of the most capable agents within Rebel Intelligence," with the ability to handle a wide range of missions, from reconnaissance to assassination and sabotage. Draven also said that Andor was capable of analyzing intelligence and acting on that intelligence without the need to contact superiors. Draven indicated that, since Andor worked for the rebellion since childhood, that the Alliance was like his family and that his loyalty was unwavering. Mothma, however, worried about the terrible things Andor and other Rebel agents were asked to do in the name of the Rebellion. Indeed, many of the missions he carried out for the Alliance were morally questionable. Mothma wondered if the command was doing enough to help agents like Andor to cope with the psychological damage inflicted by their actions.

Comprising on their morals in the name of victory was dreadful for the emotional health of Rebels like Andor. In truth, Andor had been driven to the extremes he carried out by the anguish he carried inside him. Having lost everything in his life, Andor was able to hold back thinking about his morally questionable actions until his time with Erso. Whether it was due to killing Tivik or a change in his outlook due to the adventure he had with Erso, he disobeyed orders to kill Galen Erso before revealing his internal anguish by arguing with Jyn; she compared him to a stormtrooper for following orders he thought were wrong, which made him burst out in anger because of all he had done in the name of rebellion. In the end, Andor's selflessness and regret for his past actions led to him joining the ragtag Rogue One mission. Meeting Erso and joining that mission helped Andor remember why he became a Rebel agent in the first place. Paying the ultimate sacrifice he could in

the apogee of his selfless devotion to the Rebel Alliance and wanting to bring a new hope to the galaxy, Andor willingly gave his life to ensure the Death Star plans were given to those who could use them to win the war.

Skills and abilities

Andor found that gathering intelligence required more than spying alone. He is an expert in espionage, sabotage, and assassination throughout his missions. Andor was a committed soldier and fighter, rebelling against various regimes over the course of his life. Although sometimes he questioned his actions, he accepted that he did what had to be done in the name of a good cause. He was prepared to double-cross allies to get the job done. On one occasion, he killed his informant Tivik instead of risking letting him be captured by Imperial forces.

Andor was often an unassuming man that his opponents would underestimate. After killing two Corpos on Morlana One, the Preox-Morlana sent a squad after him, with Linus Mosk warning the group not to underestimate Andor.

Equipment

Prior to joining the Rebellion, Andor wielded an MW-20 Bryar pistol, which was wielded by his adopted father Clem Andor years earlier. Andor carried Karn's blaster for a time. During the preparation for a mission on Aldhani, Arvel Skeen became suspicious of Andor after seeing the corporate-issue blaster and questioned Andor as to whom it belonged to. After the mission, Andor stashed the weapon away in a hidden box on Niamos, where it was left after he was arrested and detained in the Narkina 5 Imperial Prison Complex. When Andor later returned to the planet with Ruescott Melshi after their escape from Narkina 5, he retrieved the box and handed the blaster off to Melshi before the two parted ways.

As a member of the Rebellion, Andor wore a brown Corellian-cut field jacket that depicted his military rank and also held a personal identifier transponder that concealed a suicide pill. He also wore brown military fatigues. On Jedha and Eadu he used a blue-colored coat with fur lining. Andor owned a UT-60D U-wing starfighter/support craft called the LMTR-20.

He carried a canvas bag over one shoulder on the Ring of Kafrene and a backpack on Jedha. Andor carried an A-180 blaster before Erso stole it. Due to his years of law-bending, Andor had honed his escapology skills, and he carried a compact security kit hidden inside one of his boots.

Cassian was capable with a variety of blasters. He primarily wielded a BlasTech A280-CFE blaster—a versatile, modular heavy blaster pistol that could be reconfigured into an assault rifle or sniper rifle by adding a barrel and stock attachments, which he carries in a thigh holster. On the Ring of Kafrene, Andor killed Tivik and a pair of stormtroopers with a concealed blaster pistol of unidentified model. He used the same weapon to dispatch Krennic during the Battle of Scarif.
