Character Bio - Cassian Jeron Andor, also known by the aliases Willix, Aach, Joreth Sward, and the title Fulcrum, was a human male soldier, pilot and Intelligence officer who served in the Confederacy of Independent Systems during the Clone Wars and then the Alliance to Restore the Republic during Operation Fracture and the Galactic Civil War. Andor joined a Rebel mission to steal the plans of the Death Star, a superweapon built by the Galactic Empire. Although the mission was a success, Andor perished along with the rest of Rogue One.

Cassian Jeron Andor was a human male who was born on the planet Fest in 26 BBY to a human father and unknown mother. During the Clone Wars, Andor joined an insurrectionist cell backed by the Confederacy of Independent Systems that operated in the wilds of the Outer Rim Territories and fought against the Galactic Republic. Andor saw his first combat experience in this cell as a child soldier in 20 BBY by tossing rocks and bottles at Republic walkers and clone troopers. Sometime during his life Andor's father was killed at the Carida Academy during a protest against the expansion of Republic militarism.

Prior to 0 BBY, Andor joined the Alliance to Restore the Republic after being recruited by General Davits Draven. Holding the rank of Captain, Andor served as an officer in the Alliance's Intelligence branch.

A veteran spy of the Rebellion, Andor maintained a network of contacts throughout the galaxy who kept him informed about the activities of the Galactic Empire.

Throughout his career as an intelligence agent, Andor worked undercover and used several aliases. While working as a government agent on Ord Mantell, Andor went by the name Willix. As a senatorial contact on Darknell, he was Aach. Andor used the name Joreth Sward when he was an assistant to Admiral Grendreef. Andor also used the code name Fulcrum when he worked as a Rebel recruiter in the Albarrio sector. Andor later traveled to the planet Wecacoe in the Colonies with two other spies named Rismor, and Kertas, to extract Imperial security protocols. Instead of extracting the protocols, he reprogrammed the Imperial security droid K-2SO.

Following this, Andor and K-2SO were sent to the F'tzner system to undertake a raid on a Imperial freighter. Andor used gas to trick the Empire into thinking that smugglers stole the cargo as smugglers were known to use gas to raid transports. When they got to the cargo room, they found three Wookiees named D'Koetaa, D'Lylaa, and Wyhyatt and took them instead of the cargo. Andor then took them to the monastery moon of Charissia in the Bartahn sector. There, he left K-2SO to look after the three Wookiees.

Andor was dispatched on a mission to the Ring of Kafrene where he met Tivik, a Rebel informant from Saw Gerrera's partisans. Through Tivik, Andor learned that the Empire had built a superweapon which his informant described as a planet killer. During the meeting, Andor killed two stormtroopers who had become suspicious of the exchange. He also unwillingly had to execute Tivik, who was unable to escape the area because of an injured arm, before more stormtroopers could arrive and capture him.

Andor was stationed at the Rebel base on Yavin 4 when Jyn Erso was assigned by Mon Mothma, a leader of the Rebel Alliance, to take part in what became the theft of the Death Star plans. During the mission, Andor was assigned to keep an eye on Erso due to her reckless and potentially volatile nature and was given a secret mission to kill Galen Erso in an attempt to stop the development of the Death Star. Once he, Jyn, and K-2SO landed on Jedha, he and Jyn left to find Saw Gerrera and his rebels. Going to his various sources, the two got stuck in the middle of a battle between the Imperials and Saw's rebels, the Partisans, during which he takes out a man from the group in an attempt to save Jyn. As the fight continued, the two escape and run into K-2SO. The two are then mistaken for his prisoners and are detained but are saved by Chirrut ?mwe and Baze Malbus, only to be captured by Saw's forces for killing one of their own. While imprisoned, he found the Imperial pilot, Bodhi, and asked him of the location of Jyn's father. Shortly afterwards, the destruction of Jedha City caused the Partisans to flee, letting him escape with Chirrut, Baze, Bodhi, and Jyn.

The group arrived on Eadu, where they crashed attempting to avoid Imperial detection. Cassian and Bodhi left so that he could get in position to take out Galen and then had Bodhi leave to find a ship to escape with. He then watched a meeting between Galen and Director Orson Krennic, where he had several attempts to take him out but refused. However a strike force from the Rebellion came and attacked the facility, killing Galen in the process. He then went and rescued Jyn and the group leaves on a stolen Zeta-class cargo shuttle to Yavin 4.

Jyn tried to convince the alliance to attack Scarif in order to retrieve the plans to the Death Star, but it failed. Knowing this would happen, however, Cassian assembled a squad of Rebel assassins,

mercenaries, and soldiers to fight on Scarif and retrieve the plans. Together, they all took the stolen Imperial shuttle and left for Scarif. At landing, Jyn and Cassian took the uniforms of two Imperial men and snuck into the base. They reached the area where the plans were kept, while a battle occurred outside as a distraction. During the attempt, K-2SO sacrificed himself by locking them in the facility to avoid their deaths by Stormtroopers. The two of them then broke out and stole the plans, only to be met by Krennic and his death troopers, where they fought and Cassian was knocked unconscious. He later saved Jyn from Krennic by blasting him. He and Jyn beamed the plans to the fleet and went to the beach, where they watched as the Death Star destroyed the base, killing them and the other rebels in the area.

Andor was a human male with brown hair, brown eyes and light skin. He was a committed, steady and practical by-the-book intelligence officer with a fair amount of combat experience. Andor often kept quiet and reserved, a trait he had acquired due to his experience in war. Although fighting on the side of the Rebel Alliance, he'd been hardened by war to the point that he did not hesitate to commit morally questionable acts when necessary. However, Cassian is shown to still feel some degree of remorse and regret after some of these events, for example, when he had to execute Tivik during the mission to Kafrene.

In a briefing to Commander Mon Mothma, General Draven described Andor as "one of the most capable agents within Rebel Intelligence," with the ability to handle a wide range of missions, from reconnaissance to assassination and sabotage. Draven also said that Andor was capable of analyzing intelligence and acting on that intelligence without the need to contact superiors. Draven indicated that, since Andor worked for the rebellion since childhood, that the Alliance was like his family and that his loyalty was unwavering. Mothma, however, worried about the terrible things Andor and other Rebel agents were asked to do in the name of the Rebellion. Mothma wondered if command was doing enough to help agents like Andor to cope with the psychological damage inflicted by their actions.

As a member of the Rebellion, Andor wore a brown Corellian-cut field jacket that depicted his military rank and also held a personal identifier transponder that concealed a suicide pill. He also wore brown military fatigues and wielded an BlasTech A280-CFE blaster, a modular blaster pistol that could be reconfigured into an assault rifle or sniper rifle. As an auxiliary concealed sidearm Cassian also used a small and slim sporting blaster. Due to his years of law-bending, Andor has honed his escapology skills as he carried a compact security kit hidden inside one of his boots.
