Cover: 1/4
Altitude Range: Ground level-1km
Cost: 700 (used)
Maneuverability: 1D
Move: 70; 200kmh
Body Strength: 1D
Weapons:

Description: A Repulsorlift scooter was a single-seat, light-framed surface vehicle that was raised by a repulsor cluster and powered by a miniature fusion-power source. This scooter was easily mastered and was common on many worlds as it was little more than a bucket chair with an attached control board and windscreen.
