Planets D6 / Moraband

Name: Moraband
Region: Outer Rim Territories
Grid coordinates: R-5
Atmosphere: Breathable
Primary terrain: Desolate, Mountainous
Points of interest: Valley of the Dark Lords, Sith temple, Moraband execution chamber, Tomb of Darth Bane
Fauna: Moraband serpent

Description: Moraband, also known as Korriban, was an Outer Rim planet that was home to the ancient Sith. The desolate and mountainous world was abandoned after many ancient wars. The Valley of the Dark Lords on the planet's surface was the final resting place of Darth Bane, the Sith Lord who created the Rule of Two. During the Clone Wars, Yoda ventured to the abandoned world as part of his journey to discover the secrets of eternal consciousness.

A world of mountains and red sands, Moraband was abandoned after widespread devastation during numerous wars. Located on the surface was the Valley of the Dark Lords, a wasteland filled with the tombs of ancient Sith Lords such as Darth Bane, among others.

Moraband also known in the past as Korriban, was the homeworld of the Sith. It was left an abandoned wasteland after many wars, though its existence was never forgotten by the Sith. Darth Bane, who created the Rule of Two, was the last Sith Lord to be buried in the Valley of the Dark Lords prior to its abandonment. During the Clone Wars, Yoda was sent to Moraband by the Force Priestesses as part of his journey to discover the secrets of eternal consciousness. Once there, he encountered a number of Sith spirits, including that of Darth Bane himself. As he ventured further into the Valley of the Dark Lords, he encountered visions created by Darth Sidious, the reigning Dark Lord of the Sith who attempted to corrupt Yoda to help win the Clone Wars. The plan failed, and Yoda left Moraband behind.

Locations

Valley of the Dark Lords
The Valley of the Dark Lords was an area of Moraband that contained numerous monuments serving as crypts for deceased Darks Lords of the Sith. The largest monument in the valley housed the tomb of Darth Bane, the founder of the Rule of Two.

Sith temple

The Sith temple was the largest monument in the Valley of the Dark Lords, a corridor of ancient monuments that serve as crypts for the Dark Lords of the Sith. It contained the tomb of Darth Bane, the Sith Lord who founded the Rule of Two, and a massive execution chamber that the ancient Sith used to sacrifice Jedi prisoners.
