Description: Tech was part of Clone Force 99, an elite squadron of clone troopers with genetically engineered enhanced abilities. Tech had an aptitude for science and incredible skills with technology, to include engineering, decryption, and language translation. His appearance differed from that of normal clones of Jango Fett so he appeared younger and leaner than his genetic template.

Personality and traits

Tech made use of a heavily modified suit of scout trooper armor with a specialized visor which acted as a computer display. A computer terminal was installed into the forearm portion of his armor, enabling him to access a number of versatile functions, such as trajectory calculation, translation of alien languages and creating and replaying recorded sound effects.

Personality-wise, Tech was very talkative and communicative; one of his major quirks was his eagerness to dispense trivia knowledge about any given subject at the drop of a hat. When confronted with a task which demanded his full concentration, he tended to become oblivious to what was going on in his surroundings, unless it was a matter of life and death. He also had the hobby of recording all sentient sounds he encountered, which at one occasion helped the squad, alongside Jedi Knight Anakin Skywalker, CT-7567 "Rex", and CT-1409 "Echo" escape from a enemy base.
