Description: Cindel Towani was a female Human journalist during the time of the New Republic. In 3 ABY, when she was five standard years of age, the Towani family's starcruiser crash-landed on the forest moon of Endor. Soon after, her parents, Jeremitt and Catarine were abducted by the native Gorax, leaving Cindel and her teenage brother Mace to fend for themselves. The two children were found by the Ewok Deej Warrick and taken to live with his family in their village. After learning that Jeremitt and Catarine were being held in the Gorax's lair in the Desert of Salma, the

Towani children enlisted the help of the Ewoks and set off to rescue their parents. After a long journey, the group reached and defeated the Gorax and the Towani family were reunited.

The Towanis remained with the Ewoks while Jeremitt worked to repair their ship, and Cindel became friends with Deej Warrick's youngest son, Wicket. Later that year, however, the Ewok village was attacked by a group of Sanyassan Marauders led by King Terak and the Dathomiri Nightsister Charal. Jeremitt, Catarine, and Mace were all killed defending the Ewok village, but Cindel was able to escape with Wicket. Towani and Warrick were eventually taken in by another stranded Human, an old man named Noa Briqualon, and his companion Teek. Towani was subsequently kidnapped by the Sanyassans, who believed that she held the key to their escape from Endor, but Briqualon, Warrick and Teek rescued her from Terak's Keep. Pursued by Terak's forces, the group joined up with the other Ewoks and managed to defeat the Sanyassans and kill Terak.

Following the battle, Towani and Briqualon were able to leave the Endor moon using the power cell of the Towani family's starcruiser to repair Briqualon's starship. Towani traveled the galaxy with Briqualon for some time before he retired in the Mid Rim. Towani settled on Coruscant and became a journalist with The Life Monitor. During the Black Fleet Crisis in 16 ABY, a news story in which Towani leaked information about the Yevethan attack on Polneye helped garner public support for New Republic intervention.

Personality and traits

As a child, Towani was innocent and trusting. At age five, she stood 1.3 meters tall. She had blond hair, brown eyes and was fair-skinned. She had a close relationship with her older brother Mace, accompanying him to explore the forest moon of Endor after the crash, despite her parents' instructions to remain at the crash site. When her parents were abducted by the Gorax, Towani missed them and feared that they were dead, but took strength from her brother's presence. Towani quickly came to trust the Ewoks when they discovered her and Mace, something which took her more cynical brother some time to do. She formed an instant rapport with Wicket Warrick and the two would frequently play together, even during their perilous journey to the Desert of Salma. Towani was also able to teach her friend to speak Basic. She was later quick to make friends with Teek and Noa Briqualon.

Towani was also very inquisitive, and it was this curiosity that led her and Warrick to follow Noa Briqualon to his ship. Her curiosity combined with her trusting nature could also get her into trouble, and it was these personality traits that Charal exploited to draw her away from the safety of Briqualon's cabin and kidnap her. Even as a child, Towani showed bravery in the face of the numerous dangers she faced on Endor. Undeterred by the risks to herself, she was determined to rescue her parents from the Gorax. The deaths of her family left Towani experiencing nightmares as she struggled to overcome her loss. Without Mace to draw strength from, Towani took comfort in her friendship with Warrick and came to terms with the loss of her family after Briqualon reassured her that they were not truly gone as long as she remembered them. Briqualon became an important figure in Towani's life, and she chose to travel with him for many years after leaving Endor.

The qualities she displayed as a child would be of use to her as she grew into an intelligent and idealistic young journalist. It was these traits that brought her to the attention of Hiram Drayson as he sought somebody who would set the appropriate tone for his leaked story and would be willing to risk a shutdown order to break the story.
