Description: Telfrey was a planet in the Mid Rim, in the same system as Iskalon and Gamandar.

It was inhabited by both Humans and native Telfreyans during the Galactic Civil War.

Yom Argo and Tay Vanis, two natives of the planet, assisted in the stealing of the Death Star II plans from the Galactic Empire, which in retribution ordered a Base Delta Zero attack, known as the Telfrey Holocaust, which rendered Telfrey lifeless and uninhabitable for generations.
