Characters D6 / Boolio (Miner)

Name: Boolio
Homeworld: Sinta IV
Born: 1 ABY
Died: 35 ABY
Species: Ovissian
Gender: Male
Height: 1.78 meters
Eye color: Golden
Skin color: Green
MOVE - 11

DEXTERITY: 3D
- Blaster: 4D+1
- Brawling Parry: 5D
- Dodge: 5D
- Vehicle Blasters: 3D+2

PERCEPTION: 3D
- Command: 5D
- Hide: 4D
- Search: 5D
- Sneak: 4D+2

KNOWLEDGE: 2D
- Bureaucracy: 5D+2
- Business: 6D
- Languages: 4D+2
- Planetary Systems: 4D+1
- Streetwise: 3D+2
- Survival: 5D

STRENGTH: 2D+1
- Brawling: 3D+2
- Climbing/Jumping: 4D+1
- Stamina: 4D+2
- Lifting: 4D+2

MECHANICAL: 2D
- Repulsorlift Operation: 4D+1
- Mining Drill Operation: 4D

TECHNICAL: 2D
- Mining Tool Repair: 3D

EQUIPMENT

CREDITS - 150

Brown insulated worksuit lined with heat-conductive filaments (+2D vs Cold effects) along with an orange and brown ice-abseiling harness (+1D to climbing). Personal temperature control unit mounted on chest, a wrist-mounted comlink and data-storage unit on left arm.

FORCE SENSITIVE - N
FORCE POINTS 2
DARK SIDE POINTS 0
CHARACTER POINTS 4

Description: Boolio was an Ovissian male who worked as a mine overseer at the Sinta Glacier Colony during the war between the First Order and the Resistance. He was sympathetic to the Resistance and covertly sent supplies their way. After a First Order inspection team visited the colony, Boolio discovered a datafile in his office labeled as highly valuable intelligence for the Resistance from a traitor within the First Order.

Not wanting to transmit the data, Boolio contacted the Resistance and arranged for them to meet him face to face at the colony. The YT-1300 light freighter known as the Millennium Falcon was sent to the meeting, and upon their arrival Boolio transferred the file to the astromech droid R2-D2 on board the freighter. After the Falcon left, Boolio was killed by the First Order and his decapitated head presented to the Supreme Council by Supreme Leader Kylo Ren.

Boolio was a Ovissian male who was born on Sinta IV in 1 ABY. He worked as a mine overseer at the Sinta Glacier Colony, which extracted ice cores from the Sinta Glacier in order to harvest malsarr. During the war between the First Order and the Resistance, he was sympathetic to the Resistance and managed to covertly divert surplus materials from the mines on to transport starships friendly to their cause. When a discrepancy in the colony's ledgers was discovered a First Order team of inspectors was sent to investigate. The inspectors left without comment, after which Boolio discovered a datafile that had been left on his office datapad. The datafile claimed to contain game-changing intelligence on the First Order for the Resistance, but Boolio was unable to decrypt the file any further. Once he had authenticated it as a message from a high-ranking First Order officer based on the ciphers used, he contacted the Resistance via intermediaries.

Not wanting to risk revealing the intelligence he had been given, Boolio's message to the Resistance promised them that he could provide a regulator that they need to repair the Tantive IV, the CR90 corvette of Resistance leader General Leia Organa. In 35 ABY, the Resistance then dispatched a crew from the moon Ajan Kloss in the YT-1300 light freighter known as the Millennium Falcon to meet with Boolio face to face at the colony. The freighter passed through the icy corridors of the colony before parking beneath a hatch where the Ovissian waited. Resistance members Finn and R2-D2 greeted Boolio through a hatch in the roof of the Falcon, at which point the overseer revealed the true reason he had called them to the colony.

Data handover

After hurling down one of end of a cable for Finn to plug into R2-D2, Boolio admitted he did not know who the traitor within the First Order was but encouraged them to deliver the data to Organa. When asked how he could be repayed, Boolio told them to "win the war." Once the transfer was complete, Boolio quickly hauled the cable back up so that the Falcon could make a hasty departure, as First Order TIE/fo space superiority fighters began to chase it. The crew of the Falcon successfully delivered Boolio's intelligence to Organa and the rest of the Resistance, which informed them that the Sith Lord Darth Sidious had returned and provided the First Order with a

fleet that would soon attack all remaining free worlds.

Providing the Resistance with this intelligence ultimately cost Boolio his life, as he was killed by the First Order. Shortly after he had handed over the datafile, the Ovissian's decapitated head was presented to the Supreme Council of the First Order by Supreme Leader Kylo Ren on board the Resurgent-class Star Destroyer Steadfast. Ren declared to the Council that he knew that there was a traitor within the First Order who had sent a message to the Resistance; however, he was unaware that the traitor who had used Boolio to contact the Resistance was General Armitage Hux, one of the council members who sat before him. Hux was later executed by Allegiant General Enric Pryde aboard the Steadfast after he realized his intentions.

Legacy
Though he lost his life, Boolio's actions allowed the Resistance to hatch a plan to deal with Sidious' return. His final wish for the Resistance to win the war would be honored when they defeated the Final Order at the Battle of Exegol.

Personality and traits
Boolio had green skin, golden eyes, yellow horns and stood 1.78 meters tall; He was good natured, and asked only that the Resistance win the war against the First Order when Finn asked what they could do to repay him for his aid.

Equipment
Boolio wore a brown insulated worksuit lined with heat-conductive filaments along with an orange and brown ice-abseiling harness. He had a personal temperature control unit mounted on his chest for the low-temprature suit and wore a wrist-mounted comlink and data-storage unit on his left arm.
