Description: Chewbacca, known affectionately to his friends as Chewie, was a Wookiee warrior, smuggler, and resistance fighter who fought in the Clone Wars, the Galactic Civil War, and the conflict between the First Order and the Resistance. He hailed from the planet Kashyyyk and became a Wookiee military leader. During the Clone Wars, he was captured by Trandoshan slavers and held captive on Wasskah, but he worked with a fellow captive, Jedi Commander Ahsoka Tano, to escape. He later commanded Wookiee forces during the Battle of Kashyyyk alongside the Grand Army of the Republic, led by Jedi Master Yoda. During the battle, one of the last ones of the war, Yoda's clone troopers received Order 66 from Supreme Chancellor Palpatine and, with the help of Chewbacca, Yoda escaped Kashyyyk and the destruction of the Jedi Order.

In the years that followed, during the rule of the Galactic Empire, Chewbacca became a smuggler and the co-pilot of Captain Han Solo aboard the Millennium Falcon. They worked in the employ of crime lord Jabba Desilijic Tiure until Solo was forced to dump a shipment of spice to avoid trouble with the Empire, at which point a bounty was placed on their heads. Soon thereafter, Chewbacca and Solo were hired by Jedi Master Obi-Wan Kenobi to ferry him, Luke Skywalker, C-3PO, and R2-D2 to Alderaan on a mission vital to the survival of the Alliance to Restore the Republic. After finding Alderaan was destroyed, the group was brought aboard the Death Star, where they helped Princess Leia Organa escape from captivity and return to the Rebel base on Yavin 4. Though Chewbacca and Solo initially chose to leave Yavin 4 and not join the Rebellion, they ended up fighting in the Battle of Yavin and were instrumental in Skywalker's destruction of the Death Star, a

major victory for the Rebellion.

Throughout the war, Chewbacca and Solo fought the Empire in a number of engagements, including an assault on Cymoon 1 and the battle on Vrogas Vas. Along with Princess Organa and C-3PO, they escaped from Echo Base on the planet Hoth after the Empire tracked the Rebel Alliance there. The group sought refuge with Lando Calrissian, an old friend of Solo's, on Cloud City, but Calrissian betrayed them and turned them over to Darth Vader, the Emperor's chief enforcer, after his city was threatened. Solo was frozen in carbonite and Calrissian helped the others escape, but they were too late to save the frozen Solo from being taken by Boba Fett to Jabba the Hutt. Chewbacca and Calrissian set off to find Solo and located him in Jabba's Palace on Tatooine, where Chewbacca and his friends saved Solo and destroyed Jabba. Shortly thereafter, they fought in the Battle of Endor, where Chewbacca helped destroy the shield generator and allowed the Alliance Fleet to destroy the Death Star II. The Emperor was killed aboard the battle station, delivering a crippling blow to the Empire.

After Endor and the rise of the New Republic, Chewbacca and Solo fought to liberate Kashyyyk from the Empire. When the war finally came to a close, Chewbacca returned home to Kashyyyk with his family. After Solo's son Ben, turned to the dark side and destroyed Skywalker's new generation of Jedi, Chewbacca reunited with his old friend and the two spent many years as smugglers once more. They lost the Millennium Falcon and ended up smuggling aboard a ship called the Eravana, but they eventually found the Falcon and, with it, stowaways named Rey, Finn, and the droid BB-8. The droid had part of a map that led to the exiled Luke Skywalker, so the group brought the map to the Resistance that opposed the First Order, which had risen from the ashes of the Galactic Empire. Chewbacca soon fought in the assault to destroy Starkiller Base, a devastating First Order superweapon, a conflict in which Solo lost his life at the hands of his son. After the base was destroyed, Chewbacca joined Rey in traveling to the planet Ahch-To on the Falcon, where they found Luke Skywalker. After Solo's death, Chewbacca often served as the sole pilot of the Falcon, including piloting the ship to aid the Resistance during the Battle of Crait. Chewbacca later helped in the fight against the Emperor in Rise of Skywalker.

Personality and traits
Known for his great strength, bravery and loyalty, Chewbacca often served as Solo's conscience in their smuggling endeavors, which made people trust him more than they did Solo. However, he was also known for his stubbornness and dislike of losing. He would also show no qualms about using violence as a means to achieve his goals, but he certainly never killed without a good reason.

As a Wookiee, Chewbacca knew passion and thus, the Rebellion, and would have stood with them from the beginning, if not for Solo and the Falcon; he would not abandon them as he was bound to both, as they were to him. Few people knew that he had a mushy heart under his warrior exterior. Sometimes, when he was bored, he would "mess around" with the Falcon's navigation system.

When his friend Han Solo briefly went missing while conducting a night time search and rescue mission on the planet Hoth, Chewbacca was visibly upset and worried while he awaited Solo's return. Later, when Solo was to be encased in carbonite in Cloud City, he tried to fight to save him despite the presence of the Sith Lord Darth Vader and an Imperial security detail.

Chewbacca's desire to free his family and people led him to take part in Han Solo's campaign to liberate Kashyyyk from Imperial rule. He came up with the idea of using webweaver spiders to storm the Star Destroyer Dominion. Chewbacca loved his wife Mallatobuck and son Lumpawaroo, who had been separated from him by the Empire. He and his son experienced an emotional reunion during the liberation of Kashyyyk.

Skills and abilities
Besides the characteristic strength of his species, Chewbacca possessed exceptional skills in piloting as well as mechanic repairs, from his experience of piloting the Millennium Falcon, of which he had a great understanding of the temperamental nature of its systems. Chewbacca was notably faster at operating the Falcon's controls, a fact he kept hidden from Han to prevent hurting the smuggler's ego. Although not particularly meticulous, Chewbacca's technical skill allowed him to understand the inner workings of a great number of devices, including droids and transmitters, being able to build one out of a wrecked starship.

Like many of his people, Chewbacca preferred their native bowcaster as his personal weapon. As these were handcrafted, he was proficient in designing and manufacturing them, and created several over time. The latest known bowcaster that he crafted was during the Imperial era. It was an unconventional design, as he had used the frame and power pack of a stormtrooper blaster.
