Description: CT-782, nicknamed "Hevy" due to his expertise in the use of heavy weapons, was a clone trooper who served in the Grand Army of the Republic during the Clone Wars. Bred from the genetic template of the bounty hunter Jango Fett, Hevy trained on the planet Kamino as a clone

cadet of Domino Squad. After completing his training, Hevy was deployed to the Rishi moon which was noted for its strategic location near the Kamino system. Seeking to destroy the facilities that supplied the Republic Military with clones, the Confederacy of Independent Systems attacked the Rishi outpost with commando battle droids, putting Hevy and his squad on the defensive. Aided by Clone Commander CC-2224, "Cody," and Clone Captain CT-7567, "Rex," they attempted to retake Rishi Station but were outnumbered and outgunned. Armed with a Z-6 rotary blaster cannon, Hevy confronted the Separatists alone, destroying dozens of battle droids before falling to enemy blaster fire. Wounded but alive, Hevy triggered several explosives and thereby sacrificed his life to alert the Galactic Republic to the Separatist presence on the moon, ultimately delaying the Confederacy's invasion of Kamino.
