Planets D6 / Kordoku

Name: Kordoku
Atmosphere: Breathable
Primary terrain: Mountainous
Points of interest: Jedi Temple
Flora: Trees

Description: Kordoku was a mountainous world that housed a Jedi Temple. Covered in snow and trees, and with a cloud-filled atmosphere that contained waves of pink-green lights, the world appeared white and blue when viewed from space.

After the destruction of the Sith and the First Order, Jedi Master Rey Skywalker, in an attempt to train her friend Finn in the Jedi ways, opened herself to the Force and found a passage in the sacred Jedi texts that directed her to Kordoku. The Jedi Master thus traveled to the world, promising to her friends that she would return to Kashyyyk on Life Day for the celebrations.

Points of interest
Jedi Temple
The Jedi Temple on Kordoku was a Jedi site that held a key to the galaxy's past which allowed the user to travel to different points in time.

In or after 35 ABY, Rey Skywalker was directed by the sacred Jedi texts to visit the temple on Life Day to use the key to the galaxy's past so a Jedi's future would become clear. She entered the temple, used the force to retrieve the key from inside, and used it.
