Creatures D6 / Para fish

Name: Para fish
Designation: Fish
Skin color: Silver
Homeworld: Bogano
Habitat: Bodies of water
Diet: Herbivore

Dexterity: 2D
Perception: 1D
Strength: 1D

Special Abilities

Acidic Flesh: Para fish have slightly acidic flesh, not so much to do harm to anything which eats them, but perhaps lead to an upset stomach (Easy Stamina check to avoid).

Move: 8 (Swimming)
Size: 0.4m long

Description: Para fish were a species of fish native to the planet Bogano. They fed primarily on algae fragments and other plants, with many dying off when algae supplies were too low. Their decomposition process raised the acidity of the planet's water, which gradually wore away at the ground below and formed sinkholes that encompassed much of Bogano's landscape.
