Creatures D6 / Lung plant

Name: Lung plant
Classification: Plant
Homeworld: Kashyyyk

Strength: 3D

Special Abilities

Rapid Expansion: The Lung plant, to defend itself, rapidly inflates, pushing anything in contact with it away at high speed. This pushes the target 1D+2 meters away, humanoids can use this to be bounced upwards allowing much higher jumps.

Move: 0
Size: 1-2m

Description: The lung plant was a plant native to the planet Kashyyyk. When threatened, it filled its body cavity with air to appear larger. If a slyyyg attempted to graze on its leave, the plant instantly released the air it held to push its predator back.
