Characters D6 / Imperial Senator Leia Organa

Name: Imperial Senator Leia Organa
Homeworld: Alderaan
Born: 19 BBY, Polis Massa (2 days after Empire Day)
Species: Human (Alderaanian)
Gender: Female
Height: 1.5 meters
Mass: 51 kilograms
Hair color: Brown
Eye color: Brown
Skin color: Light

DEXTERITY 3D
- Blaster 7D+2
- Blaster Artillery 3D+2
- Brawling Parry 4D
- Dodge 7D
- Grenade 4D
- Lightsaber: 8D+1
- Melee Combat 5D+2
- Melee Parry 5D
- Vehicle Blasters 4D

KNOWLEDGE 4D
- Alien Species 7D
- Bureaucracy 9D+1
- Cultures 9D+1
- Languages 7D
- Planetary Systems 9D
- Streetwise 6D
- Survival 8D
- Tactics 6D+2
- Value 6D+1
- Willpower 6D+1

PERCEPTION 3D+1
- Bargain 6D
- Command 10D+1
- Con 5D+1
- Gambling 4D
- Hide 6D
- Persuasion 7D
- Persuasion: Debate 8D+2
- Search 6D
- Sneak 6D

STRENGTH 3D
- Brawling 5D+1

Climbing/Jumping 4D+1
Stamina 6D
Swimming 5D
MECHANICAL 2D+2
Astrogation 4D
Beast Riding 3D+2
Repulsorlift Operations 4D+2
Starfighter Piloting 5D
Starship Gunnery 4D
Starship Shields 5D
TECHNICAL 2D
Computer Programming/Repair 4D+2
Droid Programming 4D
Droid Repair 4D
First Aid 6D
Lightsaber Repair: 6D+1
Security 4D+1
Starfighter Repair 3D+2

SPECIAL ABILITIES
Force Skills:
Control: 10D
Sense: 8D
Alter: 7D
Force Powers: Accelerate healing, Concentration, Absorb/dissipate energy, Control Pain, Detoxify Poison, Emptiness, Enhance Attribute, Hibernation Trance, Reduce injury, Remain Conscious, Resist Stun, Combat Sense, Danger Sense, Life Detection, Life Sense, Magnify Senses, Sense Force, Instinctive Astrogation, Receptive Telepathy, Sense Force, Injure/kill, Force Lightning, Telekinesis, Farseeing, Lightsaber Combat, Projective Telepathy, Inflict Pain, Affect mind

Force-sensitive: Y
Force Points: 25
Dark Side Points: 4
Character Points: 40
Move: 10

Equipment:
Blaster Pistol (4D), Comlink, Lightsaber (5D),

Description: Leia Amidala Skywalker was born on the asteroid of Polis Massa two days after the end of the Clone Wars and the newly established Galactic Empire's purge of the Jedi Order. She and her twin brother, Luke, who was born shortly before her, were the children of Republic Senator Padmé Amidala, who died straight after labor, and Jedi Knight Anakin Skywalker, who had recently fallen to the dark side of the Force.

Through adoption, Leia Amidala Skywalker became Leia Organa, formally becoming heiress of the Royal Family of Alderaan through the Name Day ceremony. Although it was common knowledge that she was adopted, and everyone assumed that she was just another of the many, many children left orphaned by the Clone Wars.

Leia eventually took her father's place in the Imperial Senate, becoming the youngest senator

elected. Eventually, Leia would join the Alliance to Restore the Republic, seeing it as her chance to actually help the galaxy. During the Galactic Civil War, after the transference of the Alliance's headquarters from Dantooine to Yavin 4, and a battle for the technical readout of the Death Star, Organa volunteered for the mission to transport the plans, against the wishes of her father. He reluctantly allowed her to go, but requested that she seek General Obi-Wan Kenobi on Tatooine after intercepting the plans, but before she could complete her mission she was captured by Darth Vader and taken prisoner on the Death Star.

Having received her communication sent on R2-D2, Obi-Wan Kenobi and Luke Skywalker rescued her from the Death Star, and returned her the Rebel base on Yavin IV. The Plans for the Death Star also stored within R2-D2 allowed the Rebels to plan an attack on the Battle station as it approached their base.

Infinities

Luke Skywalker led the attack on the Death Star, using proton torpedoes on an exhaust vent which would lead to a chain reaction which would destroy the moon sized battle station, but the torpedoes experienced a technical malfunction and failed to destroy the Death Star, but prevented the complete destruction of Yavin 4. Unable to fire a fully charged shot from the Death Star's superlaser, Grand Moff Tarkin orders the technicians to fire at reduced power, nearly leveling the Massassi Temple on the moon's surface and fire again to destroy the moon.
The Imperials send out a wing of TIE Fighters to pick off the remaining members of Red Squadron. Luke, driven to near-insanity by the failure of the mission and the apparent destruction of Rebel base, turns his fighter to face the TIEs alone. Eventually, Han Solo convinces Luke to flee and the Millennium Falcon jumps into hyperspace with Luke's X-wing on its tail.

The Rebel forces attempt to flee the Yavin system, but are captured by the Imperials. The Rebel leaders are imprisoned on the Death Star to await execution, but Princess Leia is taken to Coruscant, where she is put under house arrest at the Emperor's palace. After an interview with the Emperor, Darth Vader subtly begins Leia's training in the dark side of the Force.

The spirit of Obi-Wan Kenobi appears to Luke and instructs him to go to Dagobah and seek out the Jedi Master Yoda. Han takes Luke to Dagobah, where he begins his training under Yoda's tutelage. While on Dagobah, Luke enters the mysterious cave as part of his training. There, he fights and kills a vision of Darth Vader, but was shocked when he saw that the face beneath the mask was that of Leia.

Five years passed and the story resumes when the Empire celebrates the fifth anniversary of the defeat of the Rebellion by renaming the Death Star the Justice Star and having it eclipse the sun over the capital as a symbol of everlasting peace. Leia, who is now a highly trained Sith Lady, convinces the dying Palpatine to reinstate the Imperial Senate, which had been disbanded five years earlier.

Luke's training is nearing completion. The last test that remains is to once again go into the dark cave. In the cave, Luke once again faces the shadow of Vader, but this time, he is able to overcome his fears and truly connect to the Force. Luke even has a frightening vision of the Emperor, a young Obi-Wan, Qui-Gon Jinn, Darth Maul, his grandmother Shmi, his mother Padmé, his father Anakin as a child, and Leia.
Luke, Yoda, Han, Chewbacca, and R2-D2 flying the Falcon to Coruscant. Once there, the Falcon lands on the Justice Star where Yoda and R2 disembark. Yoda confronts Admiral Tarkin and takes control of him with a Jedi mind trick into giving him control of the station, which he uses to destroy the fleet in orbit over the planet.

Meanwhile, Chewbacca flies the Falcon to the planet, where Luke and Han attempt to infiltrate the Emperor's palace. Once there, Luke and Han defeat a number of red-cloaked Imperial Guards armed with doublesabers and a reprogrammed, more aggressive C-3PO before confronting the Emperor and his two apprentices, Darth Vader and Leia Organa. At his master's orders, Vader turns his lightsaber over to Leia so she could duel with Luke. Luke refuses to kill Leia, but duels with her all the same. Eventually, Luke is able to connect to Leia's rational mind by revealing the fact that he is her brother. When the duel ends and Skywalker redeems Leia, the Emperor turns his rage on the twins, casting Force lightning at them. Before they can be killed, Anakin Skywalker attacks his former master to save his children.

Luke, Leia, Han, and C-3PO are able to escape as the Emperor turns his power on Anakin. They cut their way through stormtroopers, make it to the Falcon and escape the planet. After Palpatine kills Anakin, Yoda, who is using R2 to control the orbit of the Justice Star, contacts the Emperor and announces that he is coming. Just as the Emperor returns to his throne tower, the Justice Star crashes into the planet, obliterating Darth Sidious and his greatest weapon.

The story ends a few years later on Naboo. Leia has been proclaimed the Supreme Chancellor of the New Republic after the defeat of the Empire. R2's old memory has been inserted into a new, identical body and has been reunited with C-3PO. At the very end, the specters of Obi-Wan, Yoda, and Anakin appear to Luke and Leia.
