- Small (20cm. by 8 cm.) internal "cargo" area
- Some additional tools and equipment

Move: 5
Size: 1 metre

Description: DK-3 was an R-series astromech droid in the service of a Gran trader on Pantora. The protocol droid CG-67 supervised DK-3 and the trader's other droids, fellow astromech 225 and the LE-series Clink. DK-3 and the other droids assisted in repairing the Havoc Marauder, the shuttle of the former clone trooper unit known as the Bad Batch.
