

Vehicles D6 / Irdani Performance Group

Name: Irdani Performance Group IPG-X1131 LongTail

Type: Armed podracer

Scale: Speeder

Skill: Repulsorlift operation: Podracers

Length: 10.67 meters meters (engines) plus pod

Crew: 1

Crew Skill: See Teemto Pagalies

Cargo Capacity: 5 kilograms

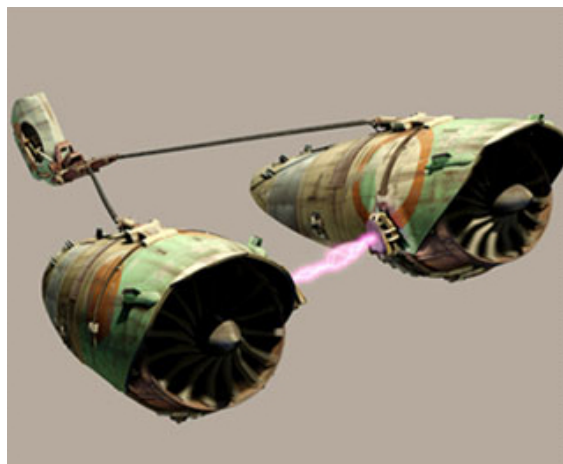

Cover: 3/4

Altitude Range: Ground - 75 meters

Maneuverability: 3D

Move: 275; 825 km/h

Body: 2D+2

Description: The IPG-X1131 LongTail was a podracer model owned by Teemto Pagalies. The name could also refer to a type of podracer engine.

The IPG-X1131 LongTail was a Podracer engine designed by the Irdani Performance Group.

Characteristics

At over ten meters in length, the IPG-X1131 LongTail sported excellent traction and acceleration, able to achieve a maximum speed of 775 kilometers per hour.

Its power was roughly equal to the total power of the StarSpeeder 1000's sublight thrusters, since stacking a Podracer equipped with a LongTail gave a Starspeeder 1000 twice the power after inadvertently snagging the LongTail during the Boonta Eve Classic of 1 BBY, according to C-3PO.
