

Vehicles D6 / JAK Racing J930 Dash-8

Name: JAK Racing J930 Dash-8 Podracer

Manufacturer: JAK Racing

Class: Repulsorcraft

Length: Engines: 9.55 meters

Crew: 1 pilot

Passengers: None

Skill: Repulsorlift operation: Podracer

Crew: 1

Crew Skill: See Ebe E. Endocott

Cargo Capacity: 6 kilograms

Cover: 3/4

Altitude Range: Ground - 45 meters

Manoeuvrability: 2D+2

Move: 250; 750 kph

Body: 3D

Description: The J930 Dash-8 engine was a Podracer engine produced by JAK Racing prior to the Invasion of Naboo. The Triffian Podracer pilot Ebe E. Endocott utilized blue J930 Dash-8 engines in the Boonta Eve Classic won by Anakin Skywalker during the year 32 BBY. Later during 22 BBY, the Devlikk competitor Raido used the engines during the Mon Gazza Maze event on the planet of Mon Gazza. His Podracer was destroyed, however, when he rammed another competitor from behind.

Characteristics

The J930 Dash-8 was a solid model of podracer. Great traction and turning, balanced acceleration and top speed, with a nice cooling and repair mechanism. While the breaks were not so good and the pod itself was still on the slow side, Ebe E. Endocott was skilled enough with it to win three consecutive championships on Malastare, place 4th in the Boonta Eve Classic of 32 BBY and was the crowd favorite at the popular Fire Mountain Rally race course on Baroonda.
