## Liberator Carrier-Cruiser

The SoroSuub Liberator's slender hull disguises the fact that it can carry a large sum of troops as well as six full squadrons of starfighters. For a capital ship, the Liberator is diminutive of size, but still finds room to host a formidable weapons complement consisting of ion cannons and heavy turbolaser batteries. Utilizing state-of-the-art hull armor, new shielding and drive unit technology, the Liberator is one of the most advanced warships in the galaxy.

The Liberator itself came to be a very versatile design and SoroSuub later fielded the Liberator missile frigate which was based off of the same hull as the original carrier-cruiser was. However, to reduce construction and maintenance costs in the missile frigate version, SoroSuub downgraded the shields and removed several of the weapon emplacements.
