Special Abilities:

Telepathy: Kallidahin communicate through a form of telepathy allowing them to send thoughts and simple feelings to any willing subject within 15 meters. This does not allow them to receive thoughts only send them, and allows them to communicate with others without being sensed by others.

Thick Skinned: Kallidahin have thick smooth fibrous skin which insulates them from the environment as their cetacean ancestors were, giving them +1D to resist heat, cold, and pressure differences.

Osmotic Membrane: Kallidahin faces are blank osmotic membranes which allow them to filter harmful substances from being breathed or absorbed by their bodies, giving them a +1D to resist

such substances.

Story Factors:

Mute: The majority of Kallidahin have no vocal cords and therefore cannot speak, relying upon their telepathy or shoulder mounted translators they often use to communicate with members of other species.

Featureless: Kallidahin faces are blank featureless osmotic membranes making it almost impossible to read their emotions except through body language, giving them a +1D to all skills which hiding their emotions may help, such as Con, resisting Interrogation, etc.

Description: Maneeli Tuun was a male Kallidahin chief medic who worked on the medical facility in the Polis Massa asteroids. Bulkier in appearance to his fellow Polis Massans, Maneeli was also one of the few members of his species with the ability to speak.

Biography

When the dying Padmé Amidala was brought to the medical facility in 19 BBY, about to give birth, Maneeli Tuun rushed his medical staff to work. Despite the efforts of Tuun and his medics, Padmé passed away in theater, though the Polis Massans were able to successfully deliver the Senator's children, Luke and Leia.
