Crew: 1
Passengers: 6
Cargo Capacity: 150kg
Cover: None
Altitude Range: Ground level-0.2m
Maneuverability: 0D
Move: 10; 25kmh
Body Strength: 2D
Weapons:

Description:Rebel personnel carrier was a model of repulsorlift craft used by the Rebel Alliance. This model of personnel carrier was open on all sides, able to seat two rows of personnel back to back. They transported passengers and cargo around various Alliance installations, and were occasionally used in combat.

During their occupation of the Great Temple on Yavin 4 prior to the Battle of Yavin, the Alliance made use of the open-sided carriers to shuttle pilots and other personnel around the base.
