Droids D6 / Cybot Galactica LIN demolitionm

Type: Cybot Galactica LIN demolitionmech Autonomous Minelayer Droid

DEXTERITY 1D
KNOWLEDGE 1D
MECHANICAL 1D
PERCEPTION 3D
Search 3D+2
STRENGTH 4D+2
TECHNICAL 3D
Demolition 6D
Equipped With:
-Internal comlink
-Infrared sensors (360 degrees night vision)
-Internal storage space (20 Kg)
-Video sensor
-Dual-tread locomotion
-Fine manipulator arm under dome (for planting explosives)
-Cybot acoustic signaler (can only speak droid languages)
-Armored housing (+2D to Strength)

Move: 5
Height: 0.56 meters
Cost: 7,000

Note:The LIN droid was equipped with a visual sensor and an acoustic signaler that could communicate in the warbling of Droidspeak only. It could be used as a military droid, helping to deploy pressure bombs and anti-repulsor grenades.
The droid was able to move its manipulator arm 360 degrees, so it could both lay mines where it had just been and keep them away from its own heading.

Description: The LIN demolitionmech autonomous minelayer, commonly known as the LIN Demolitionmech, was a droid marketed by Cybot Galactica as a mine-laying and demolitions specialist.

Characteristics

The LIN droid was equipped with a visual sensor and an acoustic signaler that could communicate in the warbling of Droidspeak only. It could be used as a military droid, helping to deploy pressure bombs and anti-repulsor grenades.

The droid was able to move its manipulator arm 360 degrees, so it could both lay mines where it had just been and keep them away from its own heading.

History
During the Clone Wars, LIN droids were used by the Galactic Republic to clear mines.

During the Galactic Civil War, the Galactic Empire also utilized these droids, and many were found in civilian employ.

Cybot Galactica stopped the production of the droid after a charge being held by one of the droids detonated in a mine on Gosfambling. 10 miners died of suffocation in the cave-in. While it was found that the fault lay in the charge, the bad publicity was enough for them to quietly retire the line, though they were made in numerous enough numbers to appear across the galaxy, especially in the Outer Rim.
