

J'quille Missile Frigate (revised)

The J'Quille missile frigates are refitted old clunkers of dreadnoughts. They have been equipped with concussion missile launchers and nuclear warhead launchers for planetary bombardment. Each clan builds their own missile frigates and thus no two Missile frigates are exactly alike making it all but impossible to perform surgical strikes. The vessel's nuclear launchers are concealed until launch is imminent then the bulkheads spin over to reveal the launchers and present them to the planet the craft orbits.

These craft usually move in large groups and quickly pummel a planet back to the stone age before space forces can arrive. But in case enemy space forces do arrive the craft are fitted with turbolasers and concussion missiles to deal with space threats.

The craft may be slow and not very maneuverable but they can take a beating and dish one out.

These Craft though seem ridiculous have been realized by various RanCorp naval officers and have been put into service in the mainstay of the J'Quille's home sector, the H`kebra sector.
