

Starships D6 / Wertokian Hive Cruiser

Wertokian Hive Cruiser

These ship though are small relative to star destroyers or even Wertokian fighter carriers, the Hive class cruiser inspire much fear. It has a sleek agile blade like shape to it and seems far larger than it is. It is armed with ion cannons and tractor beams but those are mainly to allow it to capture vessels intact. Its main assault comes from its built in automated fighter drone factories. These factories build and release small state of the art attack drones which are centrally controlled elsewhere on the cruiser. The fighters may also be held in bays but after the drones launch, the factories get to work building more. The cruiser's control systems can handle up to two full wings of drones but it is a great strain on the operators. The few battles these ships have been in have earned them a reputation for vicious power.
