-Heuristic processor
-Eight manipulator arms
-Two hand appendages
-Two tool appendages
-Two instrument appendages
-Weapon use programming
-Self-destruct system

Move: 8
Size: 1.6 meters
Cost: 13,000

Description: WED-15-I7 was a WSB-15 sabotage droid, a fourth-degree military sabotage droid

model physically identical to the WED Treadwell repair droid. WED-15-I7 was individually physically identical to the WED-15 Septoid Treadwell. The droid had eight manipulator arms, along with ten treaded wheels at its base. Possessing gray plating, WED-15-I7 had two red panels at the base above the treaded wheels, along with a pair of gray sensors.

By 0 BBY, WED-15-I7 served the Galactic Empire as a maintenance droid with a "Septoid" nickname—both characteristic of the WED-15 Septoid Treadwell model the individual WSB-15 was physically identical to. A fiercely loyal maintenance droid, WED-15-I7 specialized in extending Imperial resources' effective operational lives.
