Description: 1-JAC was a LOM-series protocol droid that was active during the reign of the Galactic Empire. In 9 BBY, 1-JAC was on the planet Daiyu where he had placed a bounty on the Jedi Obi-Wan Kenobi, his hunt led him across the city and eventually to its rooftops, where he spotted and

fired at the Jedi Master with two blaster pistols. Eventually he snuck up behind Kenobi while he was talking to a young Leia Organa, but the con artist Haja Estree shot the droid from behind before he had a chance to capture Kenobi. He was being shot again after Haja Estree gave the permission code to Obi-Wan Kenobi.
