Characters D6 / Luke Skywalker {As of The E

Name: Luke Skywalker {As of The Empire Strikes Back}
Homeworld: Tatooine
Born: (2 days after Empire Day), 19 BBY, Polis Massa
Species: Human
Gender: Male
Height: 1.72 meters (5ft 8in)
Mass: 73 kilograms
Hair color: Blond
Eye color: Blue
Skin color: Light

DEXTERITY 3D
- Blaster 6D+2
- Brawling parry 5D
- Dodge 7D+1
- Lightsaber 7D+2
- Melee combat 7D+2
- Melee parry 6D

KNOWLEDGE 2D
- Alien species 4D
- Bureaucracy 5D+1
- Streetwise 4D
- Survival 6D
- Value 4D

PERCEPTION 2D+1
- Bargain 3D
- Command 5D
- Hide 4D+2
- Search 5D
- Sneak 4D+2

STRENGTH 3D
- Brawling 6D+1
- Climbing/Jumping 6D
- Lifting 4D
- Stamina 6D

MECHANICAL 4D
- Astrogation 5D
- Beast riding 4D+2
- Repulsorlift operation 8D
- Sensors: 4D+1
- Space Transports 5D
- Starfighter Piloting 6D
- Starfighter Piloting; X-Wing: 8D
- Starship Gunnery 7D+1

Starship Shields 7D
TECHNICAL 3D
Computer Programming/Repair 5D
Droid programming/Repair 6D
First Aid 4D+2
Lightsaber Repair 5D+2
Repulsorlift Repair 7D
Starfighter Repair 5D+2

Special Abilities:
Control 6D
Sense 5D
Alter 5D
Force Powers: Accelerate Healing, Concentration, Control Pain, Detoxify Poison, Emptiness, Enhance Attribute, Hibernation Trance, Reduce Injury, Remain Conscious, Resist Stun,Danger Sense, Instinctive Astrogation, Life Detection, Life Sense, Receptive Telepathy, Sense Force, Telekinesis, Farseeing, Lightsaber Combat, Projective Telepathy

Force Sensitive: Y
Force Points: 12
Dark Side Points: 0
Character Points: 30
Move: 10

Equipment: Lightsaber (5D), Blaster Pistol (4D), Comlink, Utility Belt, Astromech (R2-D2), Starfighter (Red-5, X-Wing)

Description: Luke Skywalker was a renowned Force-sensitive Human male who helped defeat the Galactic Empire in the Galactic Civil War and helped found the New Republic, as well as the New Jedi Order.

Born in 19 BBY as the son of the fallen Jedi Knight Anakin Skywalker and the Queen and Senator of Naboo, Padmé Amidala, Luke was raised on Tatooine and hidden from Emperor Palpatine and his father, who had recently become Darth Vader, Dark Lord of the Sith. In 0 BBY, Skywalker's life changed forever. A chance purchase of two droids, R2-D2 and C-3PO, led to him to receive training in the ways of the Force from Jedi Master Obi-Wan Kenobi and to meet Han Solo, and Princess Leia Organa, who was, unbeknownst to him, his twin sister. Skywalker then destroyed the first Death Star and joined the Rebel Alliance.

Over the next few years, he fought in many of the most important battles of the Galactic Civil War, helping to found Rogue Squadron and fighting Imperial forces across the galaxy. In 3 ABY, Skywalker received Jedi training from Yoda, and learned from Vader that the Sith Lord was his father.

Biography
Early life (19–0 BBY)
Luke Skywalker was born on the asteroid colony of Polis Massa in 19 BBY, shortly after the end of the Clone Wars and the start of the Great Jedi Purge. He and his twin sister Leia, who was born shortly after him, were the children of Galactic Republic Senator Padmé Amidala and the Jedi Knight Anakin Skywalker, a former hero of the Jedi Order who had recently fallen to the dark side of the Force and become a Sith Lord. The twins' mother had been choked by their father on

Mustafar after Skywalker believed Amidala to have betrayed him, causing the weakened Amidala to lose her will to live and die not long after giving birth to Luke and Leia. Obi-Wan Kenobi and Yoda knew that the children, both having a natural affinity for the Force, needed protection from Palpatine and their father. Deciding it would be best if they were separated, the two Jedi Masters agreed to send the infant boy to live with his father's stepbrother, Owen Lars, and his wife, Beru, on Tatooine. Leia was sent to live under the protection of her newly adopted parents, Bail and Breha Organa of Alderaan.

Kenobi took the infant to Tatooine personally, making the first leg of the journey in General Grievous's ship, the Soulless One to Nar Shaddaa, where he sold the starfighter to buy passage to the homeworld of the Lars family. Intending to watch over Skywalker as he grew, Kenobi chose to go into hiding on Tatooine and live close to the boy.

During the first days of his exile, Kenobi visited the Lars homestead every day, always trying to stay clear of Owen and Beru so that they would not see him, in order to watch Luke from afar. Later Kenobi's intervention in the family business of the Lars would mark him an unwelcome man in Owen's eyes, and, as a result, Kenobi would eventually stop watching the boy every single day. According to Skywalker, his first use of the Force was when he was roughly six and, through the Force, located a lost screwdriver that was under the couch. He was severely scolded by his uncle, with the argument that he could only have known its location because he placed it there, and afterward learned not to duplicate the stunt.

Skywalker spent the first nineteen years of his life on the Lars' moisture farm, where his uncle tried unsuccessfully to discourage all of his adventurous tendencies. This created friction between the two as Skywalker's daring nature conflicted with Owen's staid sensibilities. As a teenager, Skywalker dreamed of adventures beyond Tatooine and clashed with his uncle over his desires to fly among the stars to distant worlds. When prompted with inquiries about his father's involvement in the Clone Wars, Lars told him that his father had been "a navigator on a spice freighter." Despite this mild deception, Skywalker became an adventure-seeking youth, piloting his Incom T-16 Skyhopper through Beggar's Canyon and racing his landspeeder with little regard for his own safety. In addition to sharing his father's natural piloting skills, Skywalker developed a knack for mechanical repairs while looking after droids and fixing the moisture vaporators. At some point, he owned a dog.

Skywalker cultivated a group of like-minded friends on Tatooine, amongst whom he earned the nickname "Wormie." The group included Deak, Windy, Camie Loneozner and Fixer, whose horizons did not extend much past Tatooine itself; and "Tank" and Biggs Darklighter, who shared Skywalker's dreams of joining the Imperial Academy and becoming pilots. Darklighter was perhaps Skywalker's closest friend, whom he looked up to as a brother. Biggs left for the Academy in 1 BBY, much to Skywalker's pride, jealousy and dismay. As more of Skywalker's friends left the planet to follow their dreams, he became increasingly frustrated that his uncle would not allow him to leave, claiming that he still needed help with the farm. In truth, Owen was trying to prevent Skywalker from following in his father's footsteps.

Galactic Civil War (0–4 ABY)

The purchase of two droids by Skywalker's uncle changed the youth's life forever. With the discovery of a desperate message to Obi-Wan Kenobi contained within the astromech droid R2-D2, Skywalker soon found himself in the company of Kenobi after being attacked by Sand People. Kenobi then revealed to Skywalker that he had once been a Jedi Knight who served in the Clone Wars with Skywalker's father. He went on to inform Skywalker that his father was no cargo pilot, but a Jedi Knight struck down by Darth Vader.

Soon after, Skywalker and Kenobi came upon a group of slaughtered Jawas—the same ones who sold the droids to Owen Lars. Luke deduced from learning that Imperial stormtroopers were responsible that they might have looked into the sales records of the droids, and rushed home in the hopes of saving his aunt and uncle. Upon quickly returning home, Skywalker discovered that he was too late: his aunt and uncle had been murdered by Imperial stormtroopers looking for R2-D2 and C-3PO. With his family dead, he agreed to accompany Kenobi to Alderaan to deliver the astromech, who was carrying the plans for the Death Star, to Bail Organa at the behest of Organa's daughter, Princess Leia Organa. The two traveled to the Chalmun's Cantina to obtain passage off the planet and met Han Solo and his first mate Chewbacca. Skywalker nearly had a fatal run-in with Ponda Baba in the cantina. Obi-Wan brokered a deal to pay Solo two thousand credits up front plus fifteen more when they arrived on Alderaan. Luke sold his speeder to pay for the two thousand up front.

Rescue on the Death Star

After escaping stormtroopers and blasting off the planet in Solo's ship, the Millennium Falcon, Kenobi began Skywalker's instruction in the ways of the Force, much to the mocking of Solo. This teaching, however, was soon interrupted by their arrival in the Alderaan system and their discovery of the planet's destruction. They then spotted a patrolling TIE Fighter, and, upon following it, found that it was approaching what appeared to be a small moon. To their horror, however, it turned out to be the Death Star. Caught by the Death Star's tractor beam, they were brought aboard the massive space station.

Once on board, Kenobi separated from Skywalker, Solo, Chewbacca, and the droids to deactivate the tractor beam. However, when R2-D2 discovered that Leia Organa was being held captive, Skywalker insisted on rescuing her. With Solo and Chewbacca's help, the trio made it into the detention area in the guise of Imperial stormtroopers escorting a Wookiee prisoner. They were able to rescue Organa but had to jump into the garbage chute in order to escape the pursuing Imperial forces. Later, Skywalker and Organa were separated from Solo and Chewbacca, but after swinging across a deep shaft, they were to meet back up with their companions in the hangar bay.

Eventually, the group escaped the Death Star, but only after Kenobi sacrificed himself in a duel with Darth Vader. They traveled to the hidden Rebel base on Yavin 4, even though the Death Star was tracking them. It was then that Solo received his reward for rescuing Organa and prepared to leave the group. Skywalker attempted to persuade him to stay and help them against the Empire but Solo refused, deeply disappointing him.

Hero of the Rebellion

It was at the Yavin Base that Skywalker first became an official member of the Rebel Alliance. He spent much time in the base's flight simulators, showcasing his piloting skills for the Rebellion's leaders. In several simulations he was opposed by an entire starfleet and was killed only twice. Red Leader Garven Dreis, after inspecting Skywalker's simulator results with Vanden Willard, approached him and told him how impressed he was with his abilities. Dreis welcomed him as a member of Red Squadron, gave him his own T-65 X-wing starfighter, and assigned him as Red Five. It was Keyan Farlander who showed Luke the basics of flying an X-wing.

Just prior to boarding his X-wing, Skywalker encountered his old friend Biggs Darklighter. The two would be flying as wingmen just like old times in the upcoming battle. In a brief conversation, Darklighter reassured Dreis of Skywalker's piloting skills, and promised Luke that the two would catch up on each other's stories when they got back.

Skywalker took part in the Battle of Yavin, witnessing the death of many compatriots, including

Darklighter. After the death of the two squadron leaders, he took it upon himself to lead the final assault. With the timely arrival of the Millennium Falcon and the guidance of Kenobi's spirit, Skywalker took a single shot and used the Force to direct his proton torpedoes to their target, destroying the station. For this action he, Chewbacca, and Han Solo were awarded the Medal of Bravery.

In 1 ABY, Luke Skywalker was contacted by Mallatobuck, the wife of his friend Chewbacca, while he was working with R2-D2 on an engine in a workshop. Chewbacca was supposed to go home with Han Solo for Life Day—an important Wookiee festival—but there was no sign of the Millennium Falcon around Kashyyyk. Mallatobuck was worried, and she wanted to know whether Skywalker had seen her husband recently. The Rebel pilot had no clue why the Falcon was late, but he tried to reassure Mallatobuck, advising her to smile and to trust Solo and Chewbacca's ability to overcome any danger. At bit later, Darth Vader ordered the Blockade of Kashyyyk in hopes of catching captain Solo and his Wookiee first mate. However, the Imperial agents were fooled into thinking the Rebels had already left the planet, and the blockade ceased. Luke Skywalker then went to Kashyyyk along with Princess Leia and attended the traditional Life Day ceremony.

In 2 ABY, he accompanied Leia Organa on a diplomatic mission to the Circarpous system, where they crash landed on the planet of Mimban. On Mimban, Skywalker and Organa encountered a Force-sensitive old woman named Halla. They struck a deal with her, promising to find the Kaiburr crystal if she promised to aid them in their escape off the planet. However, Darth Vader was also looking for the powerful Kaiburr crystal. Both in pursuit of the powerful Force relic, Skywalker and Vader dueled in the ancient Temple of Pomojema. Every movement of Skywalker was guided by the spirit of Kenobi and empowered by the crystal, so the young man amazingly managed to hold Vader off, even managing to sever the Dark Lord's mechanical arm. Shocked, Vader tumbled down a deep pit, ending their duel.

Hoth

Transferred to Echo Base alongside Rogue Squadron in 3 ABY, Skywalker participated in regular patrols of the frozen perimeter. While reconnoitering the surroundings of Echo Base, Skywalker was attacked by a wampa. He regained consciousness in the creature's cave, severed its arm with his lightsaber, and escaped only to find that he was far from Echo Base. After a long walk in the icy wind, he collapsed from exhaustion. Near death, he had a vision of Kenobi, who told him to seek the teachings of Yoda in the Dagobah system, and was then rescued by Han Solo.

Skywalker recovered from his wounds, including a deeply gashed face and a crushed cheekbone, in a bacta tank, but did not have much time to recover; one of Vader's thousands of probe droids, launched across the galaxy in search of the Jedi and the new Alliance base, had reached Hoth and sent proof of Rebel activity to the Galactic Empire. In the ensuing battle, Skywalker led Rogue Squadron in an effort to counter the attack and buy time for the evacuation of Echo Base. Under his leadership, the speeders proved more effective in attacking the massive Imperial walkers than the Empire realized was possible. Furthermore, even after he was shot down, Skywalker demonstrated his formidable potential as a Jedi when he proceeded to single-handedly destroy two walkers, including the Blizzard 4, with spectacular effectiveness. As Imperial forces breached the defenses, the last Rebel transport departed and Skywalker fled the planet aboard his X-Wing.

Training to become a Jedi

Skywalker then traveled to Dagobah, where he encountered Yoda. In their initial meeting, Skywalker was frustrated and confused about his surroundings and was thus rather short tempered with the diminutive Yoda, who did not initially identify himself. Skywalker gained a new appreciation

for the small creature upon learning his identity, though Yoda agreed to train Skywalker only at the insistence of Kenobi's spirit. Skywalker's training proved to be difficult, as his adventurous past had shaped his mind toward action and emotional instinct. When Yoda asked him to enter a cave in which he was supposed to find only what he took with him, he was challenged by a vision of himself wearing Darth Vader's armor. Shortly after, he had a vision of Han Solo and Leia Organa suffering at Cloud City on Bespin. Despite Yoda and Kenobi's warnings and disapproval, Skywalker rashly departed from Dagobah to rescue them.

Duel with the Dark Lord

Skywalker arrived at Cloud City and, with blaster drawn, moved in to rescue his friends. He was shot at by Boba Fett and ambushed by a group of stormtroopers and Imperial officers. He briefly spotted Organa being used as a human shield by a Imperial officer. As she was dragged away, Leia attempted to warn him that he was walking into a trap. While attempting to pursue them, Skywalker's path was diverted to the carbon-freeze chamber where Darth Vader awaited him.

Skywalker engaged the Dark Lord in a fierce duel. Vader proved his superiority in his customized Form V swordplay, executing cho mai and Dun Möch. After severing Skywalker's hand from his body, Vader attempted to seduce the weakened Jedi to the dark side of the Force, offering Skywalker the chance to destroy the Emperor and "bring order to the galaxy." In his efforts to sway Skywalker from his defiant refusals, Vader then revealed his identity as Skywalker's father.

Faced with this shocking and horrifying claim and the even more fearsome temptation to join Vader, Skywalker found the moral courage to choose death instead by throwing himself down a long shaft. He was sucked through an opening portal at the bottom of the chamber, then through another one which led out of the floating city. Skywalker grabbed onto a weather vane, preventing a fall to his death. Weak and helpless, Skywalker at first called out for Kenobi, but failed to contact him. He then reached out to Organa with the Force, and soon the Millennium Falcon, with Lando Calrissian, Organa, Chewbacca, and the droids onboard, arrived to rescue him. After reuniting with the Rebel fleet, Skywalker received his cybernetic hand aboard the Redemption.

Personality and traits

In his youth, Luke was often impatient, looking ahead to the future with little regard for his present surroundings. Like his father, he was impulsive, reckless, and often had little regard for his own personal safety. According to Han Solo, his first impression of Skywalker was a naïve kid who needed to be taught a thing or two.

However, as his skills in the Force progressed and after losing a hand to Darth Vader, Luke became more patient and seasoned, and was often seen as having wisdom beyond his years. However, he still retained his idealistic worldview of his youth, believing that Vader was redeemable.

Luke was known for being empathetic to his friends and would go to great lengths to help them, whenever he could. At some times, he could be almost passive, serene—a result of his mastery of the Force that allowed him to remain calm and in control even in the heat of battle. His loyalty and devotion to his comrades was virtually unshakable,

Powers and abilities

Lightsaber abilities

Though Luke received little training, he became an exceptionally skilled Jedi in combat, making him one of the most skilled Jedi to ever live. Without a master, it was his natural and unparalleled aptitude that contributed in the impossible advancement of his skills. On Bespin, Luke revealed that

he was an extraordinarily gifted duelist after only one brief session with Obi-Wan Kenobi, and later, Yoda, able to pose a challenge to his much more experienced father, visibly impressing Vader.

Force powers
Luke Skywalker inherited immense levels of strength in the Force from his father, enough so as to actually rival Anakin, giving him the Force potential to become what his father was supposed to become—the Force potential of the Chosen One.Luke's first conscious use of the Force was to locate a lost screwdriver under a couch, when he was only 6 years old. Ever since then, Luke greatly advanced his skills and powers in the Force, becoming incredibly skilled in a great number of Force powers and was considered to be the most powerful Force Sensitive in history by some.

During the Battle of Yavin, Luke managed to destroy the first Death Star by letting the Force tell him when to fire his proton torpedoes, while traveling at very high speeds, not knowing the distance to the port, and having no previous knowledge of proton torpedoes and their capabilities. Astonishingly, Luke only had little training with the Force at the time.

Only a short time after being given a lightsaber by Obi-Wan, Luke was able to instinctively block several blaster bolts fired in rapid succession by a remote, despite his lack of prolonged formal training. Without any guidance except a handbook left by Obi-Wan Kenobi, Luke Skywalker successfully built his first lightsaber, merely three years after he was first introduced to the Force, and undergoing formal training for less than a year. Further testament to this was shown when Luke was able to successfully Mind trick a stormtrooper into disregarding his concealed lightsaber, roughly two months after he had first seen Ben Kenobi perform it.

Other abilities
Like his father, Luke was an expert pilot, being the person who was responsible for destroying the first Death Star and managing to evade Darth Vader himself (albeit with help from Han Solo). He also landed a crashing Imperial Star Destroyer, with almost no loss of life, on Coruscant by allowing the Force to guide him at the Liberator's controls, mirroring a similar achievement by his father at the end of the Clone Wars. Skywalker continued to pilot an immense variety of starships throughout his life.

Luke was proficient in unarmed combat. He often used physical attacks when he was in lightsaber combat to defeat enemies.

Luke was able to speak a variety of languages such as Galactic Basic, Huttese, Jawa Trade language, Shyriiwook, and Yuzz, and he claimed to know twelve other common languages.

Lightsabers
Luke Skywalker's first lightsaber was his father's former weapon, retrieved and given to him by Obi-Wan Kenobi. During the first three years of his adventures, Luke upgraded the lightsaber by placing a shard of Kaiburr crystal in the focusing crystal hold and adding other parts such as an activator board. He wielded it until it fell into the depths of Cloud City after being defeated by Darth Vader. Years later after recovering it from a clone of himself, Luke gave the weapon to Mara Jade.

After losing his father's lightsaber on Bespin, Luke wielded another lightsaber of unknown origin until, half a standard year after the duel.
