Description: R2-Q5 was an R2 series astromech droid. Made by Industrial Automaton, he served the Galactic Empire aboard the DS-2 Death Star II Mobile Battle Station, performing maintenance and repair as needed. Like many Imperial astromechs, he was fitted with spy devices allowing human overseers to monitor personnel. He single-handedly thwarted a software infiltration of the Death Star II by the rogue assassin droid IG-88B. During the era of the Resistance, R0-GR included R2-Q5 in "droidography."
