Creatures D6 / Dweebit (Yuuzhan Vong Bioge

Name: Dweebit
Type: Yuuzhan Vong Biogenically Created Insect

Dexterity: 2D
Perception: 1D
Strength: 1D

Special Abilities:

Yuuzhan Vong Pet: Yuuzhan Vong Pets, like themselves, are completely indetectable through the Force, and cannot be directly affected by it (inderect methods, such as throwing a rock at the biot, still work, but powers such as Lightsaber Combat, Detect Life or Telekinesis do not work).

Noxious Fumes: The Dweebit has the ability to emit noxious fumes. These fumes convert normal atmosphere into a mix of carbon dioxide, methane and sulfur along with a complicated concoction of Yuuzhan Vong molecular bacteria. The end result is a complete atmosphere poisoning and the death or mutation of all wildlife in the area, or if there are enough Dweebits, on a planetary scale.

Short Lifespan: Dweebit Beetle colonies have been genetically engineered to have a life span of approximately one standard month. After such a time, a genetically timed virus is released into the population, eradicating the beetle colony. This was engineered into the Dweebit's by the Yuuzhan Vong to further weaponize the insect, as the noxious fumes they emit only last as long as the Dweebits are alive to maintain the mix.

Move: 6
Size: 0.02 meters (length)
Orneriness: 3D+1

Description: The Dweebit was a small reddish-brown beetle. It originated in the Yuuzhan Vong Galaxy, and was first introduced into the Galaxy by Yomin Carr. He used several Dweebit colonies to poison the atmosphere of the planet Belkadan over the course of several days.
